VI.—COURSES

TABLE 28.—*Courses of study in*

NOTE.—Studies in

| | Name and location. | Course. | Classics. | Mathematics and astronomy. |
|---|------------------------------------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | University of Alabama, University, Ala. | A. B. | Freshman: Latin—Horace, Latin prosody, exercises in writing Latin; Greek—Gram. (Goodwin), Leighton's Lessons, Xen. Sophomore: Latin—Horace, Cic., Caesar, Latin comp.; Greek—Xen., Plato, Herod., Greek comp. Junior: Latin—Catullus, Tibullus, and Propertius, Latin metres, Roman lit., Tacitus, comp., extemporalia, Terence, and Pliny's letters; Greek—Thucyd., Homer, Greek hist. comp., Æschylus, Sophocles, Eurip., or Aristophanes. | Freshman: Alg. (Wells), geom. (Wentworth). Sophomore: Trig. and analyt. geom. (Wentworth). Senior: Astron. (Newcomb and Holden). |
| | | B. S. | Freshman and Sophomore: Same as in A. B. course, except that Greek is elective with physics and chem. | Same as in A. B. course. |
| | | C. E. | | Freshman: Same as in A. B. course. Sophomore: Trig., descrip. geom., analyt. geom., quaternions. Junior: Dif. and integ. calc. (Taylor). Senior: Astron. (Snell's Olmsted, Newcomb and Holden). |
| 2 | University of California, Berkeley, Cal. | A. B. | Freshman: Latin—Livy, Cicero, Horace, comp.; Greek—Homer, Herod., Thucyd., Xen., Demos. Sophomore: Latin—Horace, Cicero, Plautus, Terence, Roman archaeology; Greek—Plato, Æschylus, Eurip., Sophocles. Junior: Latin—Cic., Quint., Juvenal, Tacitus. Greek—Sophocles, Plato, Lysias, Demos. Senior: Latin—Cic., Lucretius, Rom. lit., Virgil, elegiac poets; Greek—Demos., Æschines, Aristophanes, Greek lit. | Freshman: Geom., alg. Sophomore: Trig., analyt. geom. Junior: Dif. and integ. calc., dif. equations, analyt. geom. of space, conic sections (Salomon), quaternions, math. exercises in lab'y. Senior: Any elective, gen. astron. (Newcomb and Holden). |
| | | B. L. | Latin—Same as in A. B. course. Senior: Greek—Greek lit. | Same as in A. B. course. |
| | | Ph. B. | Freshman: Latin—Livy, Cic., Horace, comp.; Greek—Homer, Herod., Thucyd., Xen., Demos. Sophomore: Latin—Horace, Cic., Plautus, Terence; Greek—Plato, Æschylus, Eurip., Sophocles. | Freshman and Sophomore: Same as in A. B. course. Junior: Dif. equations, conic sections, quaternions. |
| | | B. S. in Agr. | | Freshman: Geom., alg., trig., analyt. geom., dif. calc., math. exercises in lab'y. Sophomore: Dif. calc., int. calc. Junior: Sur. Senior: Astron. |
| | | B. S. in Mech. | | Freshman: Same as in B. S. course in Agr. Sophomore: Dif. and integ. calc., analyt. geom. of space, math. exercises. Junior: Dif. equations, least squares, analyt. mech., conic secs., quaternions. Senior: Hydrodynamics, any elective. |

OF STUDY.

colleges and universities.—PART I.

Italics are elective.

| English. | Modern languages. | Philosophy. | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|---|
| Freshman: Gram. and anal. (Meiklejohn), comp., elocution. Sophomore: Comp. and rhet. (Raub), comp., higher rhet., elocution. Junior: Essays, Eng. lit. (Kellogg), Eng. classics, orations. Senior: Anglo-Saxon (Sweet), Eng. lang. (Gilmore), Eng. classics, orations. | Junior: French—Principia, Fr. reader (Otto); German—Gram. (Ahn), reader (Whitney), Lamartine. Senior: French—Lacombe, Molière, Corneille; German—Schiller, Goethe, Lessing. | Junior: Logic (Jevons-Hill). Senior: Ment. phil. (Haven), moral phil. (Peabody). | 1 |
| Freshman and Sophomore: Same as in A. B. course. | Same as in A. B. course..... | | |
| Same as in B. S. course..... | | | |
| Freshman: Eng. prose style. Sophomore: Hist. of Eng. lit., Eng. classics. Junior: <i>Shakespeare, Burke, old English</i> . Senior: <i>Chaucer and middle English, Longfellow's Dante, advanced old English, Milton</i> . | Sophomore: <i>Introductory courses in French and German</i> . Junior: German— <i>Middle high Ger., Goethe or Lessing</i> . French— <i>Advanced course</i> . Senior: German— <i>Lessing or Goethe</i> ; French— <i>Advanced course</i> . | Junior: <i>Empirical psychology, hist. of European phil.</i> Senior: <i>El. ethics, ancient idealism, modern idealism, Kant's pract. phil.</i> | 2 |
| Same as in A. B. course..... | Freshman: German— <i>Gram.</i> (Joyne-Meissner), <i>prose</i> (Boisen); French— <i>Gram.</i> (Kee-tel), <i>reading</i> . Sophomore: German— <i>Schiller</i> ; French— <i>Gram., Horace, discours sur le style</i> (Buffon), <i>Hernani, Le Misanthrope</i> . Junior and Senior: Same as in A. B. course. | Same as in A. B. course. | |
| Freshman: <i>Eng. prose style</i> . Sophomore: <i>Hist. of Eng. lit.</i> , Eng. classics. Junior and Senior: Same as in A. B. course. | Same as in B. L. course | Same as in A. B. course. | |
| Freshman: Eng. prose style, preparation of summaries. | Freshman and Sophomore: Same as in B. L. course. Junior: German— <i>Goethe or Lessing</i> ; French—Same as in B. L. course. | | |
| Same as in B. S. course in Agr.. | Same as in B. L. course | | |

| 2 | University of California, Berkeley, Cal.—Continued. | B. S. in Min. | | Freshman and Sophomore: Same as in B. S. course in Mech. Junior: <i>Dif. equations</i> , analyt. mech., <i>conic secs.</i> , <i>quaternions</i> , sur. Senior: Same as in B. S. course in Mech. |
| | | B. S. in Civ. Eng. | | Freshmen and Sophomore: Same as in B. S. course in Mech. Junior: <i>Dif. equations</i> , least squares, analyt. mech., sur., <i>conic secs.</i> , <i>quaternions</i> . Senior: Hydrodynamics, nav., astron., any elective. |
| | | B. S. in Chem. | | Same as in B. S. course in Agr. |
| 3 | University of Colorado, Boulder, Colo. | | Latin—Mythology, Tibullus, Propertius, Horace, Cicero, Juvenal, Tacitus, Plant., Terence, Lucretius, Catullus, Virgil, Rom. hist., Rom. Archaeol., prose. Greek—Homer, hist. of Greece, Homeric Criticism, Soph., Greek lit., Æschylus, Eurip., lyric poetry, Greek art and comedy, Aristophanes, comp., Demos., Socrates, Oratory, Plato, Herod., Greek phil., Thucyd., Greek in English. | Higher alg. (Bowser, Olney, Todhunter), trig. (Wentworth, Wells, Chauvenet), plane analyt. (Briggs, Olney, Newcomb, Salmon), solid analyt. (Aldis, Frost), calc. (Taylor, Byerly, Rice and Johnson, Williamson), determinants (Hanus, Peck, Scott), quaternions (Hardy, Tait, Hamilton), hist. of math. (Ball, Gow, Allman), descrip. astron. (Chambers), pract. astron. (Loomis, Chauvenet, Doolittle), gen. astron. (Newcomb and Holden, Young), theoret. astron. (Watson), plane sur. (Carhart, Van Amringe, Johnson), geodesy (Gore, Clarke). |
| 4 | University of Denver, Denver, Colo. | A. B. | Freshman: Latin—Livy; Greek—Odyssey. Sophomore: Latin—Horace; Greek—Plato, Thucyd. Junior: Latin—Tacitus, Cic., Terence; Greek—Demos. Senior: Greek—A drama. | Freshman: Sph. trig. and sur. (Wells), higher equations (Howe). Sophomore: Analyt. geom., mechanics (Wood). Senior: Astron. (Newcomb and Holden). |
| | | B. L. | Latin—Same as in A. B. course. | Freshman and Senior: Same as in A. B. course. |
| | | B. S. | | Freshman: Sph. trig. and sur., higher equations, math. review. Sophomore: Analyt. Geom., mechanics. Junior: Calc. (Taylor), analyt. mech. (Peck). Senior: Math. astron. and astron. |
| 5 | Trinity College, Hartford, Conn. | A. B. | Freshman: Latin—Cic., Livy, Horace, Pliny, comp.; Greek—Homer, Herod., comp., hist., hist. of lit. Sophomore: Latin—Tacitus, hist., Catullus, Tibullus, Propertius, Ovid, Lucan, Virgil, hist. of Rom. lit.; Greek—Eurip., hist. of the drama, Plato, Demos., Theocritus, hist. of lit. Junior: Latin—Tacitus, hist., Horace, Lucretius, Quintilian; Greek—Plato, comp., Eurip., Homer, Lucian. Senior: Latin—Cic., or Seneca, Persius and Juvenal, Quintilian; Greek—Æschylus, comp., Eurip., Homer, Lucian. | Freshman: Alg., geom. of space, plane and sph. trig., sur., nav. Sophomore: Analyt. geom., analyt. mech. (Peck), Junior: <i>Dif. and integ. calc.</i> , math. and descrip. astron. Senior: Astron. |

| 93 | University of Vermont, Burlington, Vt.—Continued. | Engineering. | | Freshman: Alg., geom., trig., sur., descrip. geom. (Church). Sophomore: Sph. trig., analyt. geom., descrip. geom., calc., astron (Newcomb). Junior: Geodesy. |
| | | Chemical. | | Freshman: Same as in Eng. course. Sophomore: Analyt. geom. Junior: Calc. (opt.). |
| | | Agr. | | Freshman: Same as in Eng. course. Sophomore: Descrip. geom. |
| 94 | Middlebury College, Middlebury, Vt. | Classical.. | Freshman: Latin—Livy, comp., Cic.; Greek—Xen., comp., Homer, Greek lit., Epic poetry, antiquities (Mahaffy). Sophomore: Latin—Horace, Tac., comp., Cic., Lucretius, Plautus, hist. of Rom. lit; Greek—Sophocles, Greek lit., comp., Thucyd., Lysias. | Freshman: Alg., geom. and trig. (Wentworth). Sophomore: Sph. trig. (Wentworth), analyt. geom. (Briggs). Senior: Astron. |
| | | Lat. Scien. | Latin: Same as in classical course. | Same as in classical course .. |
| 95 | Randolph-Macon College, Ashland, Va. | Ph. B. | Latin—Livy, Tac., Horace, Tac., Cic., Juvenal, Horace. | Alg. (Wentworth, Todhunter), geom. (Nixon's Euclid, Wentworth), trig. (Newcomb), conic sections (Puckle), determinants (Peck), analyt. geom., dif. and integ. calc. (Todhunter), phil. of math. (Bledsoe), astron. (Newcomb and Holden), descrip. geom., sur. |
| | | A. B. | Latin—Gram., Cæsar, Sallust, hist. of Rome (Creighton), Cic., Virgil, Livy, Tac., Horace, Tac., Cic., Juvenal, Horace; Greek—Gram., comp. (Sidgwick), Homer, New Testament, Plato, Demos., Thucyd., Sophocles, Wilson's Mosaics of Grecian History. | Trig. (Newcomb), conic secs., determinants, astron. |
| 96 | Hampden-Sidney College, Hampden-Sidney, Va. | | Freshman: Latin—Cæsar, Virgil or Ovid, prosody, gram., Cic., comp.; Greek—Xen., gram., hist. and geog. Sophomore: Latin—Cic., Livy, gram., comp. Horace, prosody; Greek—Homer, gram., comp., Xen., Lysias. Junior: Latin—Tac., gram., comp., Quintilian; Greek—Gram., comp., Lysias, Homer, Eurip., Demos. Senior: Greek—Hist. (Grote), Demos., Plato; gram., comp.; Latin—Terence, comp., gram. | Freshman: Alg. and geom. (Wentworth), original problems. Sophomore: Alg., geom., trig. (Wentworth). Junior: Analyt. geom. (Puckle), analyt. geom. (Venable). Senior: dif. and integ. calc. (Ray), astron. (Newcomb and Holden), hist. and phil. of math. |
| 97 | Washington and Lee University, Lexington, Va. | | Latin—Gildersleeve's Primer, Smith's Principia, Cæsar, Ovid, Livy, Cic., Virgil, gram., mythology, Tac., Horace, Juvenal, Rom. hist. (Leighton), Rom. lit. (Cruttwell); Greek—Xen., Herod., Homer, comp., gram., Plato., Eurip., Demos., Thucyd., Sophocles, Isocrates, Greek lit. (Jebb). | Alg. and geom. (Wentworth), trig. (Wells), analyt. geom. (Wentworth), determinants (Peck), calc. (Taylor, Beyerly), quaternions (Hardy), descrip. geom. (Church), sur. (Davies), astron. (Young). |

| Freshman: English. Sophomore: Rhet. (Hill), Shakespeare, Chaucer. Junior: Rhet. Senior: Hist. and criticism of Eng. lit. | Sophomore: French. Junior: German. | Freshman: Moral phil | 93 |
| Same as in Eng. course | Same as in Eng. course | Same as in Eng. course. | |
| Same as in Eng. course | Same as in Eng. course | Same as in Eng. course. | |
| Freshman: Rhet. (Kellogg). Sophomore: Hist. of Eng. lang. (Lounsbury). Junior: Rhet. (Whately). Senior: Eng. lit., Chaucer, drama, 19th century poetry. | Sophomore: French. Junior: German, gram. (Whitney), German prose (Boisen), Schiller. | Junior: Logic (Jevons). Senior: Physiological psychology (Ladd), psychology (Sully), ethics, Hopkins' Law of Love, Mulford's Republic of God. | 94 |
| Freshman: Rhet. Sophomore: Old Eng. prose, Siever's gram. Eng. comp. (Bain), Anglo-Saxon primer (Sweet), Eng. lit. (Brooke), prose comp. (Minto), Eng. prose classics, <i>Middle Eng. primers</i> (Sweet), <i>Chaucer, historical gram., Spenser, Pattison's Pope, Palgrave, Arnold's, Wordsworth, and Byron, Tennyson.</i> | Same as in classical course | Same as in classical course. | |
| Eng. comp., Anglo-Saxon primer, Eng. lit., prose comp., Eng. prose classics. | French—Gram. (Whitney), Rougemont, Crane and Brun, historical gram. (Brachet), Molière, Racine, Corneille, Fr. lit. (Saintsbury), Crane. German—Gram. and reader (Whitney), <i>Lessing, Goethe, Schiller, Heine, Scheffel.</i> | Psychology (Hopkins, Porter), logic (Jevons), ethics (Hopkins), nat. theology (Flint), hist. of phil. | 95 |
| | German—Same as in Ph. B. course. French — <i>Gram., Rougemont, Crane and Brun.</i> | Psychology (Hopkins), logic, ethics. | |
| Freshman: Higher Eng. gram. (Reed & Kellogg), comp., or-thoepist (Ayers), pract. rhet. (Clark), Irving, Macanlay. Sophomore: Prac. rhet., or-thoepist (Abernethy), Anglo-Saxon (Sweet), lyrical selections, comp., Eng. lang. (Lounsbury), Chaucer. Junior: Shakespeare's primer, Macbeth, Eng. lit. (Morley and Tyler), Milton, essays. Senior: Essays, dissertations. | German—Gram. (Sheldon), gram. and reader (Whitney), Bodenstedt's translation of Hamlet, Freytag's Die Journalisten, or Schiller. French—Gram. (Whitney), Rougemont, About, Pylodet, Blouet, Saintsbury. | Junior: Porter's Elements of Intellectual Science, <i>McCosh on the Emotions, Locke on the Human Understanding.</i> Senior: Logic (Fowler), hist. of phil. (Schwegler), Porter's Elements of Moral Science, mental phil., evidences of Christianity (Fisher). | 96 |
| Our lang. (Southworth and Stoddard), Strang's exercises, lessons in Eng. (Lockwood), English poets, (Ward), Eng. gram. (Morris), longer Eng. poems (Hale), Chaucer, Anglo-Saxon, (Sweet), early Eng. (Corson), Harrison and Sharp's Beowulf, Whitney's Lang. and the study of Lang., Ten Brink's hist. of Old Eng. lit., rhet. (Whately, Genung), Gummere's Handbook of Poetics, Eng. lit. (Shaw, Taine), essays, elocution. | French—Easy lessons, Char-denal's first course, reader (Snper), Fontaine, Fr. lit. (Saintsbury or Warren), Bôcher's college plays, Corneille, Racine, Molière, Boileau, Voltaire, Hugo, La Fontaine. German—Gram. and reader (Whitney), Homann's Collection of Märchen, or Otis's Grimm's Märchen, Barring-Gould, Goethe, Schiller, Lessing, Weckebach, Heine, Ger. lit. (Hamer), Ger. Testament, Kostyak. | Metaphysics (Bowen's Hamilton), hist. of phil., logic (Bowen), nat. theology and Christian evidences (Fisher), ethics (Robinson). | 97 |

| 98 | University of Virginia, Charlottesville, Va. | A. B. | Latin—Sallust, Ovid, Curtius, Virgil, comp., Rom. hist. (Liddell), Rom. lit. (Bender), Livy, Horace, Cic., Seneca, Tacitus, Juvenal, Plautus; Greek— <i>Gram</i> , <i>Xen.</i> , <i>Lysias</i> , <i>hist of Greece</i> , <i>drama</i> , <i>Homer</i> , <i>Plato</i> , <i>Eurip.</i> , <i>lit.</i> , <i>antiquities</i> . <i>Demos.</i> , <i>Thucyd.</i> , <i>Aristophanes</i> . <i>lyric poets</i> , <i>syntax</i> . | Alg. (Todhunter), geom. (Venable's Legendre), trig. (Todhunter, Snowball), conic sections (Puckle), analyt. geom., solid geom., dif. calc. (Todhunter), integ. calc. (Williamson), calc. (Courtenav), theory of equations (Todhunter). |
| | | A. M. | Latin and Greek..... | Same as in A. B. course..... |
| | | C. E. | | Same as in A. B. course and applied math., and <i>mized math.</i> , geodesy, descript. geom. |
| | | Min. Eng. | | Same as in A. B. course and applied math. |
| | | B. S. A. | | Applied math. |
| 99 | University of Washington, Seattle, Wash. | A. B. | Freshman: Latin—Ovid, Horace, Livy; Greek—Homer, Herod. Sophomore: Greek—Plato, Edipus, Prometheus. | Freshman: Trig. and analyt. geom. (Wentworth). Sophomore: Calc. (Rice and Johnson), mech. (Wood). Junior: Descrip. astron. (Gillet and Rolfe). |
| | | B. S. | Latin—Same as in A. B. course. | Same as in A. B. course..... |
| 100 | West Virginia University, Morgantown, W. Va. | A. B. | First year: Latin—Virgil, Horace, Cic.; Greek—Herod., Homer. Second year: Latin—Livy, Rom. lit. (Bender), Horace, Cic.; Greek—Xen., Greek lit. (Jebb), Plato, Eurip. Third year: Latin— <i>Toc.</i> ; Greek— <i>Demos.</i> , <i>Sophocles</i> . | First year: Trig., sur., analyt. geom., <i>descrip. geom.</i> |
| | | B. S. | | First year: Trig., sur., analyt. geom., <i>descrip. geom.</i> Second year: Calc., analyt. mech. Third year: Analyt. mech., astron. |
| | | Engineering. | | Same as in B. S. course..... |
| 101 | University of Wisconsin, Madison, Wis. | | Greek— <i>Gram</i> , prose comp., Homer, Xen., speaking and writing Greek, Lysias, Herod., lyric poets, Demos., Eurip., Plato, derivation of technical terms. Latin—Cic., Virgil, Livy, Horace, Tac., Plautus, Catullus, gram., comp. Sanskrit—The Nala and gram., reader, Sanskrit lit. | Alg. (Van Velzer and Slichter), solid geom. (Wentworth), trig. (Wheeler), analyt. geom., dif. and integ. calc., dif. equations, modern geom., higher plane curves, sph. harmonics, elliptic functions, theory of functions, theory of numbers, quaternions, descript. geom., descript. astron., pract. astron., theoret. and pract. astron., sur., least squares, geodesy. |

and universities.—PART I—Continued.

Italics are elective.

| Biology. | Geology and mineralogy. | History and political economy. | Technics. | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|---|
| | | Freshman: U. S. hist. (Eggleston and Stephens). Sophomore: Early and mediæval England (Montgomery); modern England (Montgomery); early eastern civilizations (Myers). Junior: Greece (Myers), Rome (Allan and Leighton), mediæval and modern Europe (Myers). Senior: Mediæval and modern Europe (Myers), Amer. politics (Johnston), polit. econ. Same as in A. B. course. | | 1 |
| Sophomore: <i>Physiology and hygiene</i> (Dalton, Palmer). | Junior: Mineralogy (Dana). Senior: Mineralogy (Dana), geol. (Le Conte). | | | |
| | Senior: Mineralogy, geology. | Freshman: Same as in A. B. course. | Freshman: Drawing. Sophomore, Junior, and Senior: Civil engineering and drawing. | 2 |
| Junior: <i>Vegetal struct. and morphology, comp. zoölogy</i> . Senior: <i>Vegetal struct. and morphology, systematic and economic botany</i> . | Junior: <i>Crystallography, terminology, descriptive mineralogy</i> . Senior: <i>Dynamical, structural, and historical geology</i> . | Sophomore: <i>Gen. European U. S. hist.</i> Junior: <i>U. S. hist., comp. constitutional hist., 19th century hist.</i> Junior: <i>Comp., constitutional hist., 19th cent. hist., Rom. law, jurisprudence, political theories, polit. econ.</i> Senior: <i>Hist. of economic thought</i> . | | |
| Same as in A. B. course. | Same as in A. B. course. | Sophomore: <i>Gen. European, U. S. hist.</i> Junior and Senior: Same as in A. B. course. | | |
| Junior: <i>Comp. zoölogy</i> . | Senior: <i>Dynamical, structural, and historical geology</i> . | Freshman: English, XVII century. Sophomore: Gen. European and U. S. hist. Junior: U. S. hist., constitutional hist., 19th century hist. Senior: Comp., constitutional, 19th century, Rom. law, jurisprudence constitutional law, political theories, polit. econ., hist. of economic thought. | | |
| Sophomore: <i>Vegetal struct. and morphology, systematic and economic botany</i> . Junior: <i>Comp. zoölogy, el. and economic entomology</i> . Junior: <i>Comp. zoölogy</i> . | Junior: Mineralogy. Senior: <i>Dynamical, structural, and mineralogical lab'y</i> . Senior: <i>Dynamical, struct. and hist. geology</i> . | Junior: <i>Nineteenth century, polit. econ.</i> Senior: <i>Nineteenth century, hist. of economic thought</i> . Same as in B. S. course in agr. | Sophomore: Mechanical drawing. Junior: Mech. drawing, graphostatics. Senior: Mech. eng., civil eng., construction. | |
| | Same as in B. S. course in agr. | Same as in B. S. course in agr. | Sophomore: Mech. drawing. Junior: Mech. drawing, graphostatics. Senior: Civil eng., mining, metallurgy, construction, assaying. | |

| <p>Electives: Zoölogy, botany, biology, cryptogamic botany, microscopic anat., palæontology, comp. osteology, embryology, gen. entomology, exp. veg. physiology, structure and development of cryptogams.</p> | <p>Electives: Mineralogy of common rocks and metallic ores, determinative mineralogy, crystallography, physical geog. and meteorology, geology (Dana), historical geology, economical geology, petrography, mineral veins and metalliferous deposits.</p> | <p>Electives: Polit. econ. (Mill), Dunbar's Chapters on Banking, Cairnes's Leading Principles of Polit. Econ., Hadley's Railroad Transportation, Laughlin's Bimetallism, history of economic theory, investigation and discussion of pract. economic questions, economic hist. of Europe and America since the Seven Years' War, hist. of tariff legislation in the U. S., public finance and banking, hist. of financial legislation in the U. S., management and ownership of railways and hist. of railway transportation, mediæval and modern European hist., constitutional gov't, hist. of the development of political and legal institutions in Rome to the fall of the Republic, later Roman and early mediæval hist., conflict of Christianity with Paganism, the mediæval church,</p> | <p>Electives: The fine arts, principles of delineation, color, and chiaroscuro, drawing, prin. of design in painting, sculpture, and architecture, ancient art, Roman and mediæval art, lit. and fine arts in Italy during the Middle Ages and the Renaissance, with special study of Dante. Music—Harmony, counterpoint, hist. of music, instrumentation, canon and fugue, free thematic music.</p> | 45 |

| Freshman: Physiology. Sophomore: Botany, zoölogy. Junior: Economic bot., cryptogams, medical bot., zoölogy. Senior: Botany, zoölogy. | Sophomore: Mineralogy, lithology, geology. Junior: Geology. Senior: Mineralogy, lithology, geology. | Same as in A. B. course. | Freshman: Drawing. | 49 |
| Sophomore: El. biology, zoölogy (Claus), botany. Junior: Botany, zoölogy. Senior: Anat., physiology, comp. zoölogy, embryology, histology. | Senior: Geology (Le Conte). | Sophomore: Hist. of Eng. people (Green), Gilman's American People. Junior: Polit. econ. (Perry), <i>polit. science</i> . Senior: Sociology. | | 50 |
| Freshman: Botany (Gray, Wood). Sophomore: Botany. Junior: Anat. (Martin), human and comp. physiology, entomology. Senior: Zoölogy (Packard), botany and forestry. Sophomore: Botany. | Senior: Geology (Dana). | Freshman: Ancient hist. (Swinton). Senior: <i>Constitution of the U. S.</i> (Cooley), <i>polit. econ.</i> , <i>phil. of hist.</i> (Guizot). | Freshman: Draw., agriculture. Sophomore: Military tactics, agr., gardening. Junior: Horticulture. Senior: <i>Agr. eng.</i> , <i>veterinary</i> , <i>civil eng.</i> , <i>horticulture</i> , <i>military science</i> , <i>agr.</i> | 51 |
| | | Senior: Bookkeeping and business law, <i>U. S. Constitution and political science</i> . | Freshman: Draw., shopwork. Sophomore: Military science, shopwork, draw. Junior: Draw., shopwork. Senior: Civil eng., el. of mechanism, shopwork, machine design. | |
| Elements of biology, systematic zoölogy, comp. anat. of vertebrates, ornithology, embryology, cryptogamic botany, structural and pharmaceutical botany, physiological botany, structural botany and microscopy, comp. veg. histology, morphology and physiology of phanerogams, physiology. | Mineralogy and lithology, elements of gen. geology, advanced geology and palæontology, palæontological investigations, economic geology, geology of the U. S. | Polit. and constitutional hist. of England, comp. const. law, hist. of Europe during 16th and 17th centuries, const. hist. of the U. S., Amer. colonial hist., const. law of the U. S., hist. of the Middle Ages, hist. of Europe since the Congress of Vienna, hist. of Europe during 18th century, hist. of French Revolution, comp. const. hist., principles of polit. econ., prin. of the science of finance, social and industrial reform, hist. of economic thought (Ingram), tariff legislation in the U. S. (Taussig), economics, international law, hist. of treaties. | Science and art of teaching. Practical (Fitch), school supervision (Payne), hist. of education (Compayne's Hist. of Pedagogy), study of educational systems, hist. and phil. of education. Drawing.—Geometrical topographical, mechanical, free-hand sketching, water-color, architectural. Civil engineering.—Strength and resistance of materials, theory of construction, graphical analysis of structures, engineering design, mechanism and machine drawing, dynamics of machinery, hydraulics, stereotomy. Mechanical engineering.—Forging, woodwork, pattern work, machinery and machine drawing, dynamics of machinery, prime movers, thermodynamics, theory of machine construction, machine design, machine construction and millwork, steam engineering, naval architecture, marine engineering, Mining engineering.—Mining, metallurgy, fuel and refractory material, iron, steel, copper, zinc, lead, silver, gold, mercury. Music; bibliography. | 52 |

| Junior: Botany, zoölogy. | Junior: Crystallography, mineralogy, dynamic and stratigraphical geology, economic geology. Senior: Economic geology, paleontology, lithology. Fifth year: Micro-lithology. | Freshman: Same as in A. B. course. Fifth year: Polit. econ., mining law. | Freshman and Sophomore: Same as in C. E. course. Junior: Strength of materials, eng. structures, drawing, shop-work, steam eng., mining. Senior: Mining, ore dressing, engineering, drawing, shop-work. Fifth year: Office-work, mining, mill-work, projects. | 56 |
| Junior: Botany. Senior: Physiology. | Junior: Mineralogy, geology. Senior: Paleontology. | Freshman: Same as in A. B. course. Senior: Polit. econ., <i>constitutional hist., hist.</i> | Freshman and Sophomore: Same as in C. E. course. Junior and Senior: <i>Steam eng.</i> | |
| Junior: Botany (elective with geology and mineralogy), <i>botany, zoölogy.</i> Senior: <i>Morphology, comp. zoölogy, physiology, biology.</i> | Junior: Mineralogy or geology (elective with botany), <i>crystallography, mineralogy, geology and phys. geog.</i> Senior: <i>Paleontology, lithology, economic geology.</i> | Freshman: Same as in A. B. course. Senior: U. S. Constitution. Fifth year: Commercial and insurance law, polit. econ. | Freshman and Sophomore: Same as in C. E. course. | |
| Sophomore: Anat. and physiology. Junior: Botany (Wood), veg. histology (Bessey). Senior: Zoölogy (Tenney and Orton). | Senior: Geology (Le Conte). | Junior: International law (Woolsey). Senior: Polit. econ. (Perry), hist. of civilization, U. S. constitutional hist. (Andrews). | | 57 |
| Freshman: Anat. and physiology (Martin). Sophomore: Anat. and physiology, botany, veg. histology. Junior: <i>Cryptogamic botany, biology.</i> | Freshman: <i>Phys. geog.</i> Sophomore: Mineralogy. Senior: Same as in A. B. course. | Freshman: Gen. hist. Junior and Senior: Same as in A. B. course. | | |
| Freshman: Hygiene. Senior: Physiology. | Junior: <i>Mineralogy and lithology.</i> Senior: <i>Geology (Le Conte), appl'd geology (Williams).</i> | Junior: Mediæval and modern hist. Senior: <i>Polit. hist. of the U. S., const. hist. of Eng. (optional), polit. econ., constitutional law, advanced polit. econ., municipal law, international law.</i> | | 58 |
| Freshman: Hygiene, physiology (Martin), botany. Sophomore: Biology. | Same as in A. B. course. | Same as in A. B. course. | | |
| First year: Hygiene, botany (Gray). Second year: Struct. botany (Thomé), zoölogy (Orton). | Fourth year: Mineralogy (Dana), geology (Le Conte). | First year: Myer's Mediæval and Modern Hist., Leighton's Rome, Smith's Greece. Third year: <i>Eng. hist., municipal law, polit. econ. (Walker).</i> Fourth year: Constitutional law (Pomeroy). | First year: Drawing. Second year: Draw., tinting, topography, plotting, mapping. Third year: Carpentry, machinery. Fourth year: <i>Engineering.</i> | |
| Second year: Botany (Gray). Third year: Struct. botany (Thomé), zoölogy (Orton). Fourth year: <i>Anat. and physiology.</i> | Fourth year: Geology (Le Conte), mineralogy. | First year: Grecian hist. (Smith), Rom. hist. (Leighton), mediæval and modern hist. (Myers), themes in hist. Third year: Laws of business (Parsons). Fourth year: Constitutional law (Pomeroy), polit. econ. (Perry), <i>hist. of Amer. politics, international law.</i> | First year: Draw., shop-work. Second year: Draw., shop-work, machine construction, dairying (Arnold), forestry (Hough), stock breeding (Miles), fruit culture. Third year: Insects injurious to farm (Treat), stock feeding (Armsby), how crops grow (Johnson), how crops feed (Johnson), <i>framing and bridge</i> | 59 |

|----|-------------------------------------------------------------------------------------|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| 59 | New Hampshire College of Agricultural and Mechanic Arts, Dartmouth, N.H.—Continued. | B. S. in Mech. Eng. | First and second years: Same as in B. S. in Agr. and Chem. Third year: Metals, <i>org. chem., qual. anal., lab'y work.</i> Fourth year: <i>Quant. anal., lab'y work, assaying.</i> | Same as in B. S. course in Agr. and Chem. |
| 60 | Rutgers College, New Brunswick, N.J. | A. B. | Sophomore: Inorg. chem. (Richter), Austin's Lecture Notes. Junior: <i>Exp. chem. (Remsen), qual. anal. (Fresenius), lab'y work, Senior: Quant. anal. (Fresenius), lectures, lab'y work, preparation of chemical substance.</i> | Junior: Physics (Deschanel). Senior: Physics (Deschanel), <i>elec.</i> |
| | | B. S. in Civ. Eng. and Mech. | Sophomore: Same as in A. B. course. | Sophomore and Junior: Physics (Ganot). |
| | | B. S. in Agr. and Chem. | Sophomore: <i>Exp. chem., qual. anal., chem. stoichiometry.</i> Junior: <i>Quant. anal., chem. philosophy (Cook).</i> Senior: <i>Applied chem. (Wagner's Technology), quant. anal. org. chem. (Remsen and Pinner-Austen), assaying.</i> | Same as in B. S. course in civil eng. and mech. |
| 61 | College of New Jersey, Princeton, N. J. | A. B. | Senior: <i>Gen. chem., lab'y chem., applied chem.</i> | Junior: Physics (Anthony and Brackett). Senior: <i>Pract. physics.</i> |
| | | B. S. in Gen. Science. | Freshman: Inorg. chem. Sophomore: <i>Qual. anal.</i> Senior: <i>Quant. anal.</i> | Junior: <i>El. mechanics, elec., magnetism, acoustics, optics.</i> Senior: <i>Pract. physics, math. physics.</i> |
| | | B. S. in Chem. and Mineralogy. | Freshman and Sophomore: Same as in B. S. in gen. science. Junior: <i>Quant. anal.</i> Senior: <i>Quant. anal.</i> | Junior: Same as in B. S. in Gen. Science. |

and universities.—PART II—Continued.

| Second and third years: Same as in B. S. course in Agr. and Chem. | Same as in B. S. course in Agr. and Chem. | Same as in B. S. course in Agr. and Chem. | <i>construction, roads, streets, and pavements</i> (Gilmore). Fourth year: Sanitary eng. (Philbrick), vet. med. and surg. (Courtenay). | 50 |
| Freshman: Physiology (Dalton), comp. zoölogy (Orton). | Senior: Geology (Dana), | Sophomore: Ancient and modern hist. (Fisher). Junior: The Eng. constitution, hist of civilization (Guizot). Senior: Polit. econ. (Walker and Perry), <i>comp. study of the growth of the modern constitutions</i> , political ethics, the duties of citizenship (Lieber and Woolsey). Constitution of the U. S. (Cooley), <i>invasion of Italy by the French, the historical drama</i> . | First year: Draw., shopwork. Second year: Draw., shopwork, machine construction. Third year: Framing and bridge construction, mechanism (Stahl and Woods). Fourth year: Shopwork, machine construction, sanitary eng., steam eng. (Holmes), draw. | 60 |
| Freshman: Physiology, comp. zoölogy, botany (Gray). | Same as in A. B. course. | Sophomore and Junior: Same as in A. B. course. Senior: Polit. econ., polit. ethics., duties of citizenship, Constitution of the U. S. | Freshman: Drafting. Sophomore: Railroad curves (Henck), drafting. Junior: Drafting. Senior: Engineering (Mahan), architecture, draughting, bridge building (Wood). | |
| Freshman: Same as in B. S. course in civil eng. and mech. Junior: Veg. physiology. | Senior: Geology, determinative mineralogy (Dana). | Same as in B. S. course in civ. eng. and mech. | Freshman and Sophomore: Drafting. Junior: Drafting, agriculture. Senior: Prin of agr., drafting, architecture. | |
| Sophomore: Human anat. and physiology, zoölogy, botany. Senior: <i>Biology, histology</i> . | Junior: <i>Physical geog.</i> Senior: Geology (LeConte), <i>palæontology</i> . | Sophomore: Freeman's general sketch. Senior: Jurisprudence and polit. econ., <i>comp. politics, international and constitutional law</i> (Gallaudet), <i>hist. of ancient art</i> . | | 61 |
| Freshman: Botany, morphology of plants. Sophomore: Human anat. and physiology, zoölogy, histology, botany (Gray). Junior: Histology, morphology. Senior: <i>Biology</i> . | Freshman: Crystallography. Sophomore: Determinative mineralogy. Junior: Descrip. mineralogy. Senior: Geology, phys. geog. | Senior: Same as in A. B. course. | Freshman and Sophomore: Drawing. Senior: <i>Strength of materials</i> . | |
| Freshman, Sophomore, and Junior: Same as in B. S. in gen. science. | Freshman, Sophomore, and Junior: Same as in B. S. in gen. science. Senior: geology. | Senior: Jurisprudence and polit. econ. | Freshman and Sophomore: Drawing. | |

CHAPTER XXIX.

MANUAL TRAINING.

The very full consideration given the statistics of manual training in our last report leaves no occasion, after so short an interval, to do more than present the statistics that the Bureau has since been able to obtain.

It would be unreasonable to expect that the Bureau's list of systems having introduced manual training is exhaustive, for the system introducing manual training is under no obligation to spontaneously and immediately report the fact to the Bureau, nor, in many cases, does the Bureau know the fact until long afterwards through the medium of a printed city school report or a periodical. Equally unjust would it be to manual training, therefore, to claim that our figures show its condition, statistically speaking, with the greatest possible completeness.

In conclusion it is to be said that very frequently information arrives that such and such a system has introduced manual training. A blank form is sent to that system on the strength of this. But it is returned with a note to the effect that the manual training the system has is calisthenics, or drawing merely, etc., from which it may be inferred that the connotation of the term manual training is not everywhere the same.

CHAPTER XXX.

COMMERCIAL AND BUSINESS COLLEGES.

GENERAL REMARKS.

Returns have been received from 197 institutions during the past year, and the statistics of 36 institutions have been taken from the Bureau's Report of 1887-88, making a total of 233, an increase of 11 over the previous year. There has been an increase of 86 instructors and 7,183 pupils; 11 schools are reported for the first time.

The number of pupils in the business departments of colleges and secondary schools during the past year has fallen off to a considerable extent, and a corresponding increase in the enrollment of business colleges is shown in the statistical tables.

Twenty-nine per cent. of these institutions did not send any information to this Bureau for the current year. Complete statistics are necessary in order to represent the work done by the colleges. But as it frequently happens that colleges are established without being reported to the Bureau, it is quite probable that there are institutions in the country which are not on the list. If the colleges that do not appear will but send notice of their existence, a blank form will be forwarded.

It appears from a careful reading of the catalogues and returns sent by these institutions that the time required for a course of business training depends upon the natural aptitude of the student and the extent and completeness with which he wishes to qualify himself. From four to six months is the usual time necessary to complete the full business course; stenography, telegraphy, and typewriting require from three to four months each. In some of the colleges a collegiate course of four years has been added. In others special emphasis is laid upon mathematics, in which the student is rigidly examined before graduation.

During the past year the Bureau has received letters from several persons stating that, as the statistics of neighboring colleges had been falsified, they would not send those of their own institutions. This is a very embarrassing subject to discuss; the Bureau has no means of rectifying the statements it receives, and they are necessarily published as they are furnished.

The increase of the business colleges of the country has kept pace with the increase of population and with the growth of the business enterprises during the last ten years. Since 1880 the estimated increase in the number of colleges is 83 per cent.; of instructors, 173 per cent.; and of pupils, 115 per cent.

Improvements have also been made in the courses of study, and in the manner of preparing pupils for the responsible positions they seek to fill after leaving or graduating from the institutions. The most of the colleges give the student practical knowledge of how business is transacted in the large cities in banking, in insurance, in real estate, and in commercial houses. If the student is far enough advanced in mathematics and in the English branches, very little attention is given to text books. In the college building are found the college bank, with its president and board of directors, cashier, and tellers; the jobbing house and the commission house, and the insurance and the real-estate offices. The student before finishing his course is required to act as cashier, paying teller, receiving teller, shipping clerk, salesman, cashier, and bookkeeper. The student buys and sells, makes deposits, draws checks, and sustains the same general relation to the college bank and to the jobbing house that is held by a merchant in the great business world. He is also given instruction in the *modus operandi* of the insurance office, and is taught by the real-estate broker how to estimate the increased value of real estate by the increase of population and by the laws of supply and demand.

As the business of the country has enlarged and expanded, the knowledge of commercial law, of commercial calculations, and of the tariff laws of different nations has become a necessity, and business men are coming to demand a thorough practical education in all these branches before employing young men as their business assistants.

The education of the business man in all that appertains to business life is as essential as the education of the professional man in all that appertains to professional life. His attainments, his powers, and his manhood are laid under contribution, and without a thorough and practical business education he is like a ship at sea without compass or rudder.

When students were taught only the theories of business and were given only an indistinct outline of business forms, and the merchant found them unable to do the work of the office, his conclusions were that business colleges could not, or did not, educate them properly for active business life. These objections have been met in a practical manner by the introduction of practical business departments in the institutions, and by the employment of intelligent teachers that were once active business men having a practical knowledge of business forms.

The apprenticeship system has passed away, and with it the prejudice against, and the ignorance of, a business education in a business college.

Summary of statistics of commercial and business colleges for 1888-89.

CHAPTER XXXI.

NURSES' TRAINING SCHOOLS.

REMARKS ON THE STATISTICS.

As compared with the Report for 1887-88 the figures for the year under review show an increase of 145 pupils and 103 graduates. The corps of instruction is a difficult thing to define. In some instances the hospital staff has been returned as such, while in other instances the corps has been returned as composed of one or two instructors. Nine institutions report the "amount received from students at private nursing." The amount received from this source was \$21,395.

As to the text-books used there can be no doubt that Clara Weeks's Text-book on Nursing is a favorite, for in sixteen instances it is reported as being in use. In five instances Gray's Anatomy is used. There seems to be no set of text-books generally used in these schools, each school adopting its own combination irrespective of what books have been adopted by other schools. In one case the answer to the question as to the text-books used is, "Optional with the lecturers," and in another case, "Medical and surgical reference books are obtained in library."

As a large city is the condition under which a hospital can flourish, so may it be said that the nurses' training school is conditioned in a great measure on the hospital for its field of instruction. In fact these schools are almost always intimately connected with a hospital. From this it naturally follows that the financial statistics of the nurse-training school can not be given separately from those of the hospital.

CHAPTER XXXII.

EDUCATION OF SPECIAL CLASSES.

I.—EDUCATION OF THE DEAF AND BLIND.

GENERAL REMARKS ON THE EDUCATION OF THE BLIND.

The most interesting question before the educators and friends of the blind is, how to educate them to make them self-supporting. The want of confidence in them on the part of persons who can see is the great obstacle with which a blind person has to contend. The question is almost universally asked, What can they do? We have numerous instances all around us of blind clergymen, lawyers, musicians, business men, farmers, mechanics, dressmakers, typewriters, and, in fact, in almost every occupation of life we find the blind at work with a success that contradicts the oft-repeated and mistaken idea that a blind person can not be successful in this great struggle. Courage, patience, and energy will bring the same reward to the blind as they will to the seeing. The mountain side may be steeper, the path may be rougher, but concentration and courage will crown the efforts of the blind with success.

The institutions of to-day for the blind are not only educating men and women in the theories of life work, but are imparting to them a practical knowledge of such subjects as each student seems to have an aptitude for. The broadened culture of the times, and the increasing competitions in trade, demand with emphasis the most skilled products of brain and hand. It is a serious thought that men in this age are liable to get out of place, and thus it behooves all to intensify and concentrate their life work on some specific occupation.

The teacher of the blind should study until he understands thoroughly each pupil placed under his charge so that he can educate and foster any talent that he may possess. If musical ability exists, let him cultivate this talent until the student becomes an expert—a specialist. If he finds that the student has a talent for teaching, let him give him all the advantages that the institutions of to-day possess, and make him an expert teacher. Whatever occupation the blind boy or girl makes choice of for his life work, let him or her be educated in that until success has been attained. A thorough mastery of some accomplishment, profession, or calling is the condition of success in after life for the blind, as well as for the seeing.

The committee appointed at the ninth biennial meeting of the instructors of the blind have abandoned the plan of a national university, and are asking of Congress an appropriation, to be apportioned among the States, to help blind pupils who wish higher education to attend the seeing universities and colleges. A bill to this effect has been placed by the committee in the hands of the House Committee on Education.

MEETING OF THE AMERICAN INSTRUCTORS OF THE BLIND.

The tenth biennial meeting of the American Instructors of the Blind was held at the Maryland School for the Blind, July 10, 11, and 12, 1888.

The schools of the United States and Canada were largely represented.

Papers were read upon the following subjects: "Home teaching," "Higher education," "Facial perception," "Stability of office tenure," "Institution discipline," "Occupation available to the blind after finishing their school course," "The cultivation of memory," "Hints on teaching music," "Methods of teaching."

The advancement and elevation of this phase of educational work is greatly assisted by the holding of these conventions. The papers read and the methods discussed serve to stimulate every teacher in the good work.

The subjects discussed were all of the greatest importance to those interested in the education of the blind.

The paper on "The higher education and the future welfare of the indigent blind" was read by Mr. Doyle, of the Virginia Institution for the Deaf and the Blind. In it he says:

"First. Higher education for the blind is most desirable. * * * It is a fact proven abundantly by themselves that the blind have both the capacity and the desire for a higher education. * * *

"Third. All that is lacking to provide for them in this respect is a wise utilization of the means already in hand, and the securing of a certain and adequate money supply to enable the *élèves* of the institutions to enter the higher walks of learning after they have received the benefit of all the facilities that the institutions can furnish.

"Fourth. This 'certain and adequate money supply' can come from but two sources, private benefactions or public appropriations. The first can scarcely be hoped for, certainly it can not be depended upon. The second can be secured if only this association will set itself heartily, vigorously at work to secure it."

Mr. Doyle would care for the indigent blind by helping them to care for themselves. He says: "Surely if we want to raise the condition of the indigent blind man we should strive to do so, if it be possible, in such a way as to preserve his own self-respect. He should be encouraged to help himself to the extent of his abilities, and when his endeavor fails the helping hand should be extended. In working for himself he will grow stronger as he surmounts difficulties. Every time a want is supplied by a man's own efforts the faculty which is called into play becomes stronger and the receiving want is smaller in proportion to the power of meeting it. Every time a want is met by the exertions of some one else, the power of meeting it by one's own effort is weakened."

He recommends that working homes for the blind be established in the different States similar to the working home for blind men in Philadelphia.

Mr. Parmalee, of the Nebraska Institute for the Blind, read a paper upon "The relation of school work to the future of the blind." In it he says: "More stress, it seems to me, needs continually to be laid upon the development of independent thought and research, the power to reason from cause to effect, of concentration upon a given subject, and such qualities of mind as courage, zeal, and persistence; a courage which is not daunted by defeat, a zeal not dependent on moods and caprice, and resoluteness of purpose and oneness of aim which shall not be turned aside by every east wind of opposition or adversity. And, further to the same end, we should persistently endeavor to assist our charges to rid themselves of all mannerisms, to form correct habits, and withal to be able to meet their fellow-man with clean hands and a pure heart. These are the qualifications and this the work necessary in building up a character and personality which shall make itself felt in the home circle, in social or church life, or in the body politic."

SOME CONCLUSIONS OF THE ROYAL COMMISSION ON THE DEAF, BLIND, ETC.

The most important event of the year in the education of those who have lost or who have never possessed sight or hearing is the long-awaited report of the Royal (English) Commission on the Blind and the Deaf and Dumb. It was before this commission that Professor Gallaudet, of the National Deaf College, testified as noted in our report for 1885-86, and subsequently Prof. A. Graham Bell.

The commission was originally intended to investigate the condition of the blind, but subsequently the scope of the inquiry was enlarged to include the deaf and such feeble-minded persons as were educable. We are not, of course, concerned so much with the condition of the blind and deaf in England as with the conclusions that the commission has reached on the burning questions whether the pure oral method be the greatest good to the greatest number of deaf children, and what shall be done to help the blind graduate. On the question whether the New York Point is better than the Braille, a burning question in this country, there is no doubt in England; they have one system only—the Braille. It should be stated, however, in passing that classes for the blind have been established by the school boards of London, Bradford, Cardiff, Sunderland, and Glasgow. A public day school for the blind has not yet been made a part of any of our city systems of public schools, as far as this Bureau is aware. For the deaf, of course, day schools have been established for some years.

The commissioner first defines the three systems of communication used by the deaf in the following terms:

"The three systems—sign and manual, oral, and combined—while having in common the desire to enable the deaf to *earn their livelihood*, work to this end in different ways. The first specially trains the deaf to communicate and associate with their fellow-deaf; the pure oral system specially trains the deaf to communicate and associate with the hearing and speaking world; the combined system, as its name implies, tries to combine the two former, the result being that, with few exceptions,

signs and the manual alphabet prevail and cause the pupil to relinquish the use of speech and to seek the society of deaf and dumb people. * * *

"Starting upon the assumption that a written language is common to all, one party says: 'We think that the sign language is the natural way in which the deaf and dumb express themselves;' the second, 'We aim at making the deaf and dumb conversant with our own language and able to express themselves in spoken language;' the third, 'Why should not you give the deaf and dumb the advantage of both systems?' All these have a common object in view; *i. e.*, to acquire language, the first by manual alphabet in addition to signs, the second by speech alone, and the third by a combination of all three."

The commission think that all the deaf not physically or mentally unsuited for it should be taught to speak and lip-read on the pure oral system, and that all children who are deaf be taught for one year at least on the oral system. But if the oral system is to be carried out, teachers must be provided; for the oral teacher must have a thorough knowledge of the *modus operandi* of the vocal organs, the function of the tongue, lips, and nose in speech. To obtain this special training requires two years, as in Germany when these two years are additional to the usual teachers' training course.

The commission, however, is very far from advocating the radical changes that the resolutions of the Milan convention¹ caused in France.

The number taught on each system of communication in the United Kingdom is as follows:

| | |
|------------------------------------------------------|-------|
| Number taught on the manual and sign system | 1,026 |
| Number taught on the combined system | 545 |
| Number taught on the oral and pure oral system | 1,563 |
| | 3,134 |

At a recent conference of those interested in the education of the deaf and dumb the following resolutions were passed:

"*Resolution No. 1.*—That the provision of the education acts be extended to the deaf and dumb, and power be obtained to enforce the compulsory attendance of children at an institution or day school up to the age of sixteen.

"*Resolution No. 2.*—That recommendations of the royal commission Nos. 2 and 3 be approved: No. 2. That when the number under any school authority is too small to form a class, or when the child is unable to attend an elementary school, the school authority should have the power and be required either to send a child to an institution or to board out such a child under proper inspection, and to contribute to his education and maintenance such annual grants as would be required to the contribution now allowed to be paid by boards of guardians; and if there should be neither institution nor school available or willing to receive such child, the school authority should have the power, either by itself or in combination with other school authorities, to establish a school or institution for the purpose, and to educate such children under proper inspection. No. 3. That, independently of the position of the parent, a capitation grant, not less than half the cost of the education of such child, with a maximum grant of £10, should be given for all in the same way as in ordinary elementary schools, and that the fees payable by necessitous parents should not exceed those payable in the case of ordinary children, but that in all cases parents should contribute according to their ability.

"*Resolution No. 3.*—That recommendation of the royal commission No. 4 be approved; that the age of entry should, as far as possible, be seven; that pupils should, as a rule, be admitted only once a year; that the school attendance should be compulsorily enforced for at least eight years without any existing limit of distance from school, and that power should be given to local authority to pay the rail or tram of such children when necessary.

"*Resolution No. 4.*—That recommendation of the royal commission No. 7 be approved; that technical instruction in industrial handicraft should be under the education department as part of the curriculum in schools for the deaf and dumb after the age of twelve or thirteen, and that this training be continued to sixteen. After sixteen it may be left to institutions to apprentice their pupils or to send them to the technical or industrial schools provided for ordinary children.

"*Resolution No. 5.*—That this conference regards the establishment of a training college for teachers of the deaf and dumb as of paramount importance, and approves the paragraphs Nos. 19 and 20 of the recommendations of the royal commission in that behalf."

In the Bureau's Report for 1886-87, when speaking of "Workshops for the blind" (p. 838), mention is made of the "Saxon system" of care for the blind—*Fürsorge*, that is to say, protection.²

¹ See p. 821, U. S. Bureau of Education Report, 1886-87.

² The fund the interest of which is distributed, which was given in 1886-87 as \$7,500, was incorrect for that date. The fund is now about \$250,000.

The commission finds this to be the system best adapted to the purpose and recommends its adoption for the United Kingdom, under the following conditions. "(1) That a register should be kept of all the pupils leaving the institution; (2) that they should be assisted in carrying on a trade, should they wish to set up for themselves, and in the first instance be provided with tools and material gratis, and subsequently at cost price; (3) that the institutions should endeavor to provide funds to supplement the workman's earnings, grant loans, or afford him assistance in case of illness; (4) an endeavor should be made to interest some influential local agency, with which the institution should correspond on behalf of the blind."

Of course the first request is to obtain a sufficiently large fund, the interest of which would eke out the earnings of the blind workman.

At the conference already referred to, the following resolutions in regard to the blind were also presented: It is thought probable that early legislation will carry the resolutions, both for the deaf and blind, into effect.

"(1) That the time has now arrived when the education of the blind should be put on at least an equal footing with that of the seeing, and that provisions of the education acts and codes be therefore extended to them, with such modifications and further assistance as the conditions require, in accordance with the recommendations of the royal commission on this point, and that consequently those schools and institutions which are willing to accept state inspection should be granted state aid.

"(2) That in the case of the blind, whether children or adults, it is also desirable that special technical and industrial training should be added, aided by the education department, in addition to other subjects.

"(3) In reference to the respectable old and infirm blind the conference thoroughly indorses the recommendation of the royal commission, and also adopts the suggestion contained in paragraph 263 of their report, viz: 'We think that when the industrious and well-conducted blind are unable to work and have to fall back on the assistance of the poor law, the workhouse test should not be applied, and we recommend that there should be a liberal outdoor relief (which should not subject them to any legal disqualifications) given to those who have friends to live with, and that the blind be not forced to go into the workhouse; and in the case of those who are admitted to the house, the workhouse selected for the purpose should be in a town where an institution or association for the blind already exists; the blind inmates, moreover, to be treated in a more generous way than ordinary paupers; and power should be given to the guardians in London or elsewhere to set apart a separate ward or home for the reception of the aged pauper blind, or to combine with other boards in providing a separate home for them. In case of women it might be expedient to place them in a cottage home.'"

NOTES FROM CATALOGUES, ETC.

I.—Institutions for the deaf.

Alabama Institution for the Deaf, Talladega, Ala.—The commissioners and principal of this institution are earnestly recommending the establishment of a school for the colored deaf and blind.

The oral department has been carried on with good results. The institution has secured an additional teacher and intends to enlarge in this direction.

Arkansas Deaf-Mute Institution, Little Rock, Ark.—The north wing of this institution has been entirely rebuilt.

"Articulation and lip-reading and the related branches of auricular instruction have been given the same amount of attention as formerly. All those cases where it is thought there was a chance for sufficient permanent improvement to justify the attempt have been taught, and many cases where the chance seemed doubtful have been given a fair trial."

The great advantages of manual training seem to be thoroughly understood and appreciated in this institution. The department teaches drawing and painting, printing, photography, house-painting, shoemaking, sewing and domestic work. They do job printing; and all the shoes that are used in the school are made by the pupils.

California Institution for the Education of the Deaf and Dumb and the Blind, Berkeley, Cal.—There are 30 pupils in the articulation and lip-reading class of this institution. Ten minutes a day is the time given to each pupil in the class. The friends of the institution are asking for funds to enable them to employ more teachers.

"The deaf are facile in everything requiring a quick eye and dexterous fingers. Drawing, painting, modeling, carving, engraving, are among the branches of fine art in which the deaf mute may and often does excel. Of the mechanical arts none are beyond his reach, and it is only a question of advantage as to which he shall turn his hand to. Up to this time there has not been much choice of handicraft offered in this institution. Wood-working and painting shops have been established, and the results have justified the selection. The boys in both departments have made marked progress, and the cabinet work done at their hands would not discredit journeymen."

Colorado Institute for the Mute and the Blind, Colorado Springs, Colo.—Every pupil on entering the school is placed in the articulation and lip-reading class. Those whose progress warrants success are kept in the class. All the pupils are given instruction in manual training of some sort. In the carpenter shop there are a number of boys that when it becomes necessary for them to leave the institution can make a good comfortable living. The printing office publishes the Colorado Index, which has not only paid all the expenses of publication, but has been a source of revenue to the institution.

American Asylum for the Deaf and Dumb, Hartford, Conn.—"Of the pupils received into this school during the last 4 years 74 per cent. gave sufficient promise of success in acquiring speech and lip-reading to warrant their continued daily instruction in those branches. Of those taught, 47 per cent. were born deaf, 14 per cent. lost hearing under 2 years of age, 24+ per cent. lost hearing between the ages of 2 and 4 years, and 14+ per cent. lost hearing at the age of 4 years."

Of the manual training department the principal says: "Instruction in this new department was begun in 1822, and in the following year two large and convenient workshops were erected. From that day to this manual training has been a part of the instruction of every able-bodied boy, rich and poor alike, passing through his school course here. Our former pupils are now at work as cabinetmakers, carpenters, furniture-makers, in many other capacities where wood-working tools are used, and in a variety of occupations which the training of eye and hand and of the judgment here has fitted them to take up successfully."

Kansas Institution for the Education of the Deaf and Dumb, Olathe, Kans.—The opportunity is given to those who show aptitude for the learning of articulation and lip-reading, with daily recitations in the class room, in addition to the regular work.

In the industrial department the pupils are taught cabinetmaking, shoemaking, printing, and sewing.

Maryland School for the Deaf and Dumb, Frederick, Md.—"We give every child who enters an opportunity to learn to speak. No matter what the mental condition nor how unpromising the case may be, the child is faithfully taught through the first year by teachers who rank with the best in the country in oral teaching. At the end of the year those who have not made sufficient progress to justify their continuance are dropped from the oral classes and from time to time receive their instruction through the manual and sign method."

The principal, in speaking of the industrial department, in his annual report says: "All boys who are large enough are employed about 2½ hours daily, either in the shoe shops, cabinet shop, or printing office. They are assigned to one or the other, either by choice of parent of the boy himself, or the principal, and are seldom allowed to change from one to the other. Our boots and shoes are disposed of at wholesale at fair prices and are in constant demand. The shop, however, is not a source of revenue nor can any shop be which is carried on by the labor of pupils whose time is chiefly devoted to school. Our shops are schoolrooms and our foremen teachers whose business is to train workmen rather than to turn off work. The cabinet shop does all our repair work except plumbing, makes up such articles of furniture as we require, and sometimes fills orders for fine work for outside parties. We have also made a good deal of cheap work for the furniture stores."

"In the printing office we have continued the publication of the Bulletin, a biweekly newspaper for general circulation as well as for use in the school, have printed our own reports and daily lessons for the class use and other miscellaneous work."

The girls have been taught plain sewing and the use of machines. The older ones have also been instructed in dressmaking.

Clarke Institution for Deaf-Mutes, Northampton, Mass.—"In our schoolroom work our first aim is to develop the minds of our pupils and to teach language as an expression of thought. During the earlier years all effort is directed toward this end. The later years are occupied with a regular course of study, although the acquisition of language is always considered of prime importance. The ease with which such branches of study may be pursued is in exact proportion to the knowledge of language previously acquired. This knowledge of language we attempt to give through the oral method, so called. This method teaches the child spoken words first, then written words. Our communication with pupils and all instruction is through spoken or written language. Ability to understand the language of books and the spoken language of the persons with whom one is associated is all that is needed to make unlimited acquisition of knowledge possible. In so far as we can impart this ability to our pupils we furnish them in the best possible way for life among men. If we add to this such training of eye and hand as shall fit our boys and girls to support themselves, we have surely done for them the utmost in our power. With this last object in view, our older boys are employed in cabinetwork under a competent instructor from 2 to 3 hours each day. The girls are taught sewing and light housework, and instruction in wood carving and cast drawing is given to all the older

pupils who, on trial, show any aptness for either. Physical culture is not neglected. Plenty of exercise in the open air is insisted upon, and gymnastic exercises are practiced regularly in the primary school; but the need, especially for our older pupils, of a well-equipped gymnasium is greatly felt.

Michigan School for the Deaf, Flint, Mich.—The chief aim of this school is to give the pupils a knowledge of the English language. To have pupils to elegantly express themselves and think in this language is the great end sought.

No one method is used to the exclusion of others. In the oral classes pupils are confined to lip-reading and speech. The manual alphabet is generally used in all other class rooms as a means of communication.

None but expert instructors in the workshops of this institution are employed. The trades taught are those that the pupils will be most likely to find employment in when they leave the school.

After a five-years' course of study the pupils are given an industrial training-course, each pupil spending four hours daily at his work. Cabinetmaking, shoemaking, printing, plumbing, baking, and farm work are taught to the boys. The girls are taught sewing, dressmaking, ironing, making beds, sweeping, doing dining-room and kitchen work.

Minnesota Institute for Defectives, Faribault, Minn.—On entering this school all the pupils are placed in the articulation class and given a fair trial, and if the teacher is satisfied that the pupil can not successfully be taught lip-reading and speech, articulation is discontinued. Fifteen pupils are taught exclusively speech and lip-reading and have no other method of communication with each other and their teachers. More than 10 per cent. of the pupils of this institution have been found capable of receiving permanent improvement in articulation and lip-reading.

The progress in the industrial department is very gratifying to the superintendent. He says: "The shop makes education practical, not to say profitable. It makes children grow up familiar with work, and when they leave school they do not feel above work." * * *

"Manual work and intellectual work ought not to be divorced, and when a boy is taught to use his hands as well as his brains, his education is broader, more practical, and more helpful to himself and the State."

St. Joseph's Institute for the Improved Instruction of Deaf-Mutes, Fordham, N. Y.—A new and commodious building has been erected for this school; the entire cost will not exceed \$55,000. Strict attention is paid to speech and lip-reading in the more advanced classes. All the lessons are studied until the language is thoroughly understood. The industrial department also receives its full share of attention. Many of the older pupils that have left the institution have been successful in obtaining employment.

Western Pennsylvania Institution for the Instruction of the Deaf and Dumb, Edgewood, Pa.—The combined method of instruction is used in this institution. More attention is being given to articulation and lip-reading.

A new building has been erected for the industrial department, which has infused new life in this part of the work. The older pupils spend from three to four hours a day in the workshops, the younger ones about two hours. Shoemaking, carpentry, cabinetmaking, and wood carving is taught. All the furniture required for the building is made in the cabinet shop by the boys of the institution. The girls are taught plain sewing, dressmaking, and house work.

Pennsylvania Institution for the Deaf and Dumb, Philadelphia, Pa.—The board of directors of this institution has purchased a new site in the Twenty-second ward of the city of Philadelphia, containing 61 acres, at a cost of \$120,000. They hope to complete the new building in about three years. More than \$500,000 will be required for all the improvements.

In the oral department of this school there are eleven instructors and one hundred pupils. In the industrial department instruction is given in printing, drawing, tailoring, shoemaking, carpentering, glazing, dressmaking, and cooking.

Institution for the Education of the Deaf and Dumb and the Blind, Staunton, Va.—In this institution the industrial department receives especial attention. It includes carpentering, upholstering, joiner work, house-painting and baking, all under the supervision of competent instructors.

The combined method of instruction is used.

Wisconsin School for the Deaf, Delavan, Wis.—The oral and combined methods are taught in this school. Special oral instruction is given to three classes, and good results have been obtained. For twenty years past speech and lip-reading has been taught in this institution.

Two and one-half hours daily are spent in the workshops. The pupils are taught shoemaking, carpentering, printing, baking, sewing, and mending.

II.—*Institutions for the blind.*

Indiana Institution for the Education of the Blind, Indianapolis, Ind.—The normal department of music is comparatively new in this institution. The aim of this department is to give such instruction in the art and practice of teaching as to make of each pupil a successful teacher.

Great interest is felt in the industrial department of this school. The superintendent says in his annual report to the trustees: "While we do not undervalue in the least degree the many benefits to be derived from intellectual and musical culture, yet we feel that in a school for the blind too much attention can not be given to industrial education, for we recognize the fact that the mental stamina and natural inclination of many blind youths are such that if they are fitted at all by training to earn their own living it must be done by teaching them some useful trade. Furthermore, to be occupied in some congenial handicraft and be able to manipulate the different parts of simple machinery and different kinds of material are not only sources of great pleasure to the blind, but they furnish means by which habits of industry, perseverance, and activity are cultivated. * * * Therefore no scheme for the education and training of the blind that does not provide for a well-equipped and well-regulated industrial department is complete."

Kansas Institution for the Education of the Blind, Kansas City, Kans.—The superintendent in his report to the trustees speaks of the prosperous condition of this institution and the practical results of the graded system of the school. He says: "Its results have been most beneficial to the pupil as well as the teacher, making the work of both much more easy and thorough, and enabling us to give to the primary department that vigorous training which is so much needed in after life."

Speaking of the results of the point method, he says: "With a thorough knowledge of the point, equipped with all the requirements, a blind pupil will accomplish as much and with nearly the same rapidity as the seeing."

Maryland School for the Blind, Baltimore, Md.—The committee on instruction of this school strongly recommends the higher education of the pupils of the school for the blind.

"(2) Blindness is a physical defect, and always must limit the physical efficiency of the blind man, but his intellectual capability is another thing. The public is too apt to confound the two, while in practice the very fact of the physical defect actually increases the mental power, for it calls into play such faculties as concentration and attention to a higher degree than the seeing can ever need them.

"(3) If the above is true there is no class of our fellow-men who require more the benefit of a higher education. At present the public idea is that a blind man can be educated to a certain point, and at this point his physical defect places the limit. The public utterance in all the schools, 'thus far shalt thou go, and no farther,' is unfortunately taken up by the blind, for a man is very apt to believe himself to be what his fellow-man declares him, and the blind man with his sense of infirmity is probably more sensitive to such impressions than the seeing. It is not necessary to call to mind a historian like Prescott, a postmaster-general like Fawcett, or a mathematician like Carl; there are numerous instances all around us, lawyers, musicians, clergymen, business men, who have simply become so because they had the means to secure a higher education.

"(4) We are often told that such and such a blind man has failed in the struggle of life, and this is used as an argument to prove that the blind man can not successfully hold his own in this great struggle. I have made it my business to inquire of a large number of superintendents and individuals, and I have yet to meet the first case where the blind man has failed because he was blind. In every instance he would have failed from the same want of character had he been a seeing man, and to step a little lower, I have yet to find in all my experience, with one exception, a single instance of a blind beggar who was not either an imposter, vicious, or profligate, and my experience is the same as that of others connected with the blind."

Perkins Institution and Massachusetts School for the Blind, Boston, Mass.—This institution has received a bequest of \$4,250 by the will of Ann Schofield; also a gift of \$38,000 towards the endowment fund for the kindergarten department from Miss Helen C. Bradlee. The gift of Miss Bradlee is the largest thus far the institution has ever received. It will be known as the "Bradlee Fund."

The building dedicated one year and a half ago to the uses of the kindergarten has already become crowded to its utmost capacity. The director of this department has asked the trustees for a second building similar to the first one in size and architecture.

Ohio Institution for the Education of the Blind, Columbus, Ohio.—The superintendent recommends action on the part of the legislature making it compulsory to send children of proper ages and mental capacity to the school provided for them by the State. He also indorses the action of the convention of the American Instructors for the Blind in Baltimore, Md., in reference to the printing of text-books on every subject taught in the various institutions; and believes that the use of text-books will

teach them to rely more upon themselves and to utilize time lost by the oral method. He recommends the use of the New York Point in printing the majority of the books for the use of the blind, because it is more easily read by those whose fingers are less delicate to touch, and because the point is available for writing, "enabling pupils to take notes on their school work to preserve for future reference, and for purposes of correspondence." He says that higher education is desirable, and with the proper facilities provided the usefulness and happiness of the pupils will be secured, and the graduates will profit by the higher course. He recommends the addition of a collegiate department, equipped with the necessary teaching force and apparatus for acquiring the higher education.

This institution has a well-equipped manual-training department. In the tuning shop thirty-four young men are taught tuning and repairing. Eight pianos and five models of actions from different manufactories are used. Fifty-four pupils are learning to make brooms, who devote their time to this work when not occupied with other duties. In the cane-seating shop there are forty-six pupils under instruction. In the sewing department ninety-six girls are taught plain hand and machine sewing, darning and mending.

Pennsylvania Institution for the Instruction of the Blind, Philadelphia, Pa.—In this institution the higher education of the pupils is recommended, and in the manual training department the selection of special trades for the blind is considered of the greatest importance. Trades that can be followed by individuals should be selected, and care should be taken to select such trades as are not likely to be interfered with by the introduction of machinery. The superintendent also recommends instruction in business methods, and that the pupils be taught to cultivate habits of self-reliance.

This school claims to be the first to have formally introduced cooking as a regular branch of instruction.

"A room has been fitted as a kitchen, and here twice a week sixteen girls may be seen busily at work over their tasks, involving all the principles of the culinary art. Not only are they taught to bake and broil and fry, but the course goes deeper in the training in domestic economy, the arts of utilizing previously cooked foods, the making of palatable and nutritious dishes from inexpensive materials, undesirable cuts of meat, and the parts usually wasted; in fact, in the many petty household economies of which the French are masters and in which the American housewife is commonly deficient. The chemical composition of foods, as well as the requirements of the body, are all considered, and fact and rule take the place of *judgment* and *taste*, those terms so common in cook books.

"The experience of a year has shown it to be entirely practical and fully justifies the anticipations of success."

Remarks on the tables.

The Eastern Iowa School for the Deaf, at Dubuque, Iowa, and the Albany School, at Albany, N. Y., are private institutions for the education of the deaf and dumb and have been established since the preceding Report. The manual or sign method of instruction is used by the Eastern Iowa School, and the oral at the Albany School.

Of the 75 institutions for the deaf appearing in the following tables, 66 have reported direct to this Office. Forty-two use the combined method of instruction, 15 the pure oral, and 9 the manual or sign method. The number of pupils taught speech and lip-reading in the schools using the combined and oral methods as reported to us is 2,274, or about 28 per cent. of the whole number of pupils reported in the institutions for the deaf and the dumb. Two hundred and eighty-nine pupils graduated from these institutions in 1888-89. The whole number of pupils graduated since the organization of the institutions is 5,075. The number of pupils in the kindergartens is 161, and in the manual training departments 2,757. The trades taught are photography, gardening, drawing, painting, sewing, dressmaking, carpentry, printing, shoemaking, molding, patternmaking, coopering, wood engraving, wood carving, charcoal drawing, crayon drawing, typewriting, tailoring, cooking, machine sewing, millinery, stocking knitting, fancy work, scroll sawing, modeling in clay, metal working, laundry, housepainting, plumbing, bookbinding, glazing, and farming. The number of institutions that give instruction in kindergarten work is 6, and in manual training 38. The schools are raising the standards of their literary departments and are reporting progress all along the line.

The number of institutions for the blind appearing in the tables is 34, including the institution at Cheyenne, Wyo., from which no information has been received by this office. The 33 institutions reporting show an increase of 71 instructors and 274 pupils over last year's report.

In the cases of institutions for both the deaf and blind it has been found impossible to separate the receipts and expenditures of the departments for the deaf from those of the departments for the blind. In order to prevent confusion and a fictitious increase in these items, all the financial statistics received from such institutions have been placed in the tables of statistics of the education of the deaf. The school for the colored blind at Austin, Tex., is the only exception to this.

Summary of statistics of institutions for the deaf for 1888-89.

II.—EDUCATION OF THE FEEBLE-MINDED.

GENERAL REMARKS.

The first school for the care and training of the feeble-minded was opened by Dr. H. B. Wilbur in the village of Barre, Mass., in 1843. Soon after the opening of this school Dr. S. G. Howe, of the Perkins Institute for the Blind, opened a school at South Boston, Mass. New York was the next to establish a school, and Pennsylvania quickly followed. Since the establishment of the first institution 27 schools, public and private, have been opened, and nearly \$1,000,000 were expended the past year for their support.

In the plan of organization of the schools two departments are provided for—the educational and the custodial. The educational department embraces those receiving instruction not only in ordinary branches of a common school but also industrial occupations and manual labor. The custodial department has the care of those inmates to whom schoolroom exercises are considered unprofitable. An effort is made in this department to teach the pupils personal cleanliness and usefulness in domestic matters, and to break them of bad habits previously formed.

The question that arises in considering the usefulness of these schools is, can the feeble-minded be educated and trained so as to be self-supporting? It is not claimed by the friends of this class of defectives that the greater number of them can be made self-sustaining, but it is well established that many that have been sent from the institutions are leading useful lives and are not burdens to the community or to their friends.

Wherever adequate training has been given them the great majority of idiotic and feeble-minded children have been found susceptible of physical and mental improvement. It is therefore urged by all who are familiar with the facts that neither jails, nor county infirmaries, nor hospitals for the insane are suitable places for these unfortunates, but that institutions and homes as soon as possible be erected for those whose necessities demand such provision.

THE NATIONAL CONFERENCE OF CHARITIES AND CORRECTION.

The report of the committee of the Fifteenth National Conference of Charities and Correction on this subject may be briefly summed up as follows: That from 10 to 20 per cent. of those who are trained in these institutions are so improved as to enter life as self-supporting; that from 30 to 40 per cent. are made self-helpful and much less burdensome to their people, and that one-half of the whole number will need custodial care throughout life.

Of the whole number of feeble-minded persons in the United States three-fifths are said to be distributed among the middle and poorer classes. The earliest efforts should be made toward the relief of this class of our population.

The committee earnestly urge the placing of the permanently disabled in the custodial departments in buildings sufficiently remote from the industrial and educational departments of the institutions, and that they be treated by the same merciful system as the inmates of the educational and industrial departments.

About one-sixth of the feeble-minded in the United States are in the schools and homes provided for them by public and private charity.

The following resolutions were adopted by the conference:

“Resolved, That the Conference of Charities and Correction assembled in Buffalo hereby urges on all the States where provision has not been made the early establishment of institutions for the feeble-minded as a prudential measure both humane and just.

“Resolved, That this conference commends the institutions already established for the careful inquiry they are making into the causes of mental infirmity, believing that by contributing to the literature of the subject they will aid in diminishing this afflictive burden to both family and community, and will make a valued return for the public moneys used in their erection and support.”

NOTES FROM CATALOGUES, ETC.

California Home for the Care and Training of Feeble-Minded Children, Santa Clara, Cal.—The legislature at its last session appropriated funds for the purchase of a new site for the home. The committee has purchased a farm of 1,660 acres near the town of Glen Ellen, Sonoma County, Cal., for \$50,000.

Kentucky Home for the Care and Training of the Feeble-Minded, Frankfort, Ky.—We are sorry to learn of the total destruction by fire of this home. It occurred on May 3, 1889. We are very glad to learn that no lives were lost.

Massachusetts School for the Feeble-Minded, South Boston, Mass.—“We found it difficult to break away from the traditional and conventional form of institution building, which is the outgrowth of a theory that large numbers can be more cheaply

provided for in a single large building of three or four stories in height than in smaller and lower buildings. The fallacy of this theory has lately been demonstrated in a number of places, the most notable and successful instance within our knowledge being at the Willard Asylum for the Insane in New York. * * *

"By a slow process of evolution and elimination the plans were worked out to the best of our ability, and were submitted for the approval of the governor and council, in accordance with law. * * * They were approved, and we were permitted to expend \$60,000 in construction. Building has gone on during the summer, and now, as it is approaching completion, we are happy to say that it will be completed to the last detail, including boiler house, laundry, steam heating, and grading, within the sum approved."

Minnesota School for Feeble-Minded, Faribault, Minn.—The superintendent says: "In the school department, which comprises the school proper and the manual training feature, is centered the principal activity of the institution. The plan of training which we refer to as the coördinate system has been maintained—that is, individual children under instruction are occupied during short periods at a time only at one thing, and these periods alternate between the school and manual training rooms, in which the work is being conducted simultaneously. * * *

"Constructive occupations are preëminently adapted to child training, as proven by the experience of kindergarten and manual training schools everywhere."

The New Jersey State Institution for Feeble-Minded Women, Vineland, N. J.—This is a new institution and appears in our tables for the first time.

"The managers consider themselves fortunate in having secured so desirable a property, and especially a building so well equipped for the immediate reception of inmates, there being accommodation at the present time for 20 feeble-minded women."

The Garrison Home and Training School for the Feeble in Mind, Cranbury, N. J.—During the past year this institution was established at Cranbury, N. J. It is a private home for the feeble in mind and is conducted by the Rev. C. F. Garrison.

Haddonfield Training School for Girls Mentally Deficient or Peculiarly Backward, Haddonfield, N. J.—This is a private institution; the number of its pupils is limited to ten. The managers feel assured of the success of the school.

Nebraska Institution for Feeble-Minded Youth, Beatrice, Nebr.—The superintendent in his report says: "The buildings, for which the last legislature made appropriations, have been completed. * * * The building will be a great improvement on the present one in the way of convenient arrangement, as well as being much more pleasant. It is well ventilated, having separate vent flues and fresh-air flues for each room." * * *

"The experience of older institutions of this kind is, that large tracts of land are not only a matter of economy, the farm products largely supplying the institution, thus greatly lessening the cost of maintenance, but are also of great usefulness in the training and physical development of the children, agricultural pursuits being particularly adapted to persons of this class. Again, since the majority of the people of our State are engaged in farming, the pupils should be taught that which they will be able to follow under the direction of their parents when returned to their homes."

Ohio Institution for Feeble-Minded Youth, Columbus, Ohio.—The trustees of this institution have asked the legislature for an appropriation of \$100,000 for the purchase of suitable farming lands.

Pennsylvania Training School for Feeble-Minded Children, Elwyn, Pa.—Samuel A. Crozier, president, says: "Our free fund continues to invite the beneficent thought of the charitable; we gratefully acknowledge donations and bequests to this worthy object, amounting during the year to \$12,000, raising the invested fund at this day to \$101,000."

Superintendent's annual report; manual teachers; "With the beginning of the current year seven ladies were added to our corps of teachers, under the title 'manual trainers,' who, by their alternation with the school teachers, bring all the educable children of the school department under intelligent care and direction for fifteen hours out of the twenty-four. The whole staff is divided into two details, five and a quarter months each, the manual teachers of the first term being the school teachers of the second, and so alternately. I have long been of the opinion that neither the insane nor the feeble-minded should be under any less than the painstaking, continuous, and conscientious care of educated people; that long hours with illiterate, irresponsible people of the servant class is not promotive of cure or improvement. I am sure that one loud-spoken, uncouth, dictatorial attendant will do more harm to the nature of a child in the few hours that he or she may have it in care than can be eradicated by the best normal training, under the direct care of matron and teacher, during the other hours of the day."

Remarks upon the tables.

In presenting the statistics of the institutions for the care and training of the feeble-minded it appears that there has been a large increase in the number of schools, of pupils, and of teachers. Returns have been received from 26 institutions, an increase of 4 over last year. Four thousand seven hundred and eighty-four pupils are in the institutions at present, an increase of 463 over last year's report. The increase of instructors has kept pace with the increase of pupils. The number of instructors reported this year is 141, an increase of 19 over last year. The amount appropriated by the States for the public institutions is \$936,425, an increase of \$10,168.

Of the 26 institutions that have reported to this Bureau 15 are supported by States, 1 by a county, and 10 are private homes, which do not furnish any financial statistics to this Office. Eighteen have manual training and 16 have kindergartens. From four to five hours each day are spent in the schoolrooms. After the school hours the younger children are allowed to play and romp either in the play rooms or out of doors if the weather permits. The older ones, under competent instructors, are all given some useful employment, the males in the work shops or on the farm, the females at sewing or household duties.

III.—REFORM SCHOOLS.

The cottage system.—The term "family system" seems to be used as though it were a synonym for the expression, "cottage system." Thus, in answer to the inquiry, "Is your institution operated on the cottage system?" one school answers, "We have one family;" another, "The change to the family plan is now being made;" still a third, "No; but we have the family spirit." It is possible to consider the inmates of a large building having the usual assortment of stories and wings, as an overgrown family, and the building as an overgrown cottage; and it is also possible to conceive the inhabitants of such a building broken up into groups, just as a regiment is composed of companies. In both these instances the manner in which the family or families are organized is the main feature; but in the cottage system the distinguishing feature is in the isolation of the family by giving each a separate habitation. It would seem that the term "cottage system" may mean the organization of the family system, and something more.

Among the institutions reporting for the year under review, there are forty which give information in answer to the inquiry as to whether they had adopted the cottage system. Fifteen answer "yes," and eighteen "no." Three others give the responses noted in the preceding paragraph, and the others are introducing the cottage system.

Movement of the population.—Thirty-six schools, not including the Elmira State Reformatory for Men, report their population during the year, and also the number leaving during the same period. In these 36 schools there were 17,661 pupils enrolled, of whom 7,181, or 41 per cent. were disposed of or left the institutions under the following circumstances:

| | Per cent. |
|------------------------------------------------------------------------------|------------|
| Discharged at expiration of term..... | 3,892 = 22 |
| Placed out..... | 1,870 = 11 |
| Removed to other places of destination..... | 271 = 1 |
| Escaped and not captured..... | 95 = 0.5 |
| All others dismissed (in many cases the deaths have been included here)..... | 1,053 = 6 |
| Total..... | 7,181 40.5 |

Receipts from public funds, etc.—As far as reported the amount received from public funds is nearly \$2,000,000, though the reports are somewhat imperfect. This goes to show that from 85 to 90 per cent. of the means of support of reformatory institutions is received from the public treasury.¹ Of the amount received, \$357,708 were expended in building and improvements, and \$527,622 for salaries, 17 per cent. and 24 per cent., respectively, of the whole expenditure.

a Approximately.*b* In 1887-88.*c* In 1888.*d* Number of colored schools, excluding those in cities under local laws.*e* County schools only.*f* Includes only the States tabulated in the same column above.*Remarks upon the tables.*

Number of colored children in the schools.—It will be seen that, taking all the above States together, the colored children form 32.7 per cent., or a trifle less than one-third of the total school population 6 to 14 years of age, while the colored pupils form only 27.6 per cent., or little more than one-fourth of the total enrollment; *i. e.*, the colored population supplies considerably less than its due proportion of pupils to the public schools. This is the case in each of the States individually, with the exception of North Carolina and Texas, where the proportion of children and of school enrollment is about the same, and the District of Columbia, where the proportion of colored children is 35.3 per cent. and of colored pupils 36.3 per cent.

Looking at the actual number of pupils enrolled for each 100 children of 6 to 14 years of age (columns 6 and 7, Table 2) it is found to be seventy-two for the colored population and ninety-one for the white, a decided difference; and if the number of white children receiving an education outside of the public schools could be taken into consideration a still greater discrepancy would appear.

Regularity of attendance.—Not only are there fewer colored pupils than white enrolled in proportion to the number of children, but the regularity of attendance of colored pupils is less than the white. The summaries of columns 10 and 11, Table 2, show that out of every one hundred colored pupils enrolled 62.3 on an average attend each day; and out of a like number of white pupils 65 attend each day on an average. This is not a very great difference, however, and under all the circumstances may be considered a satisfactory relative showing. In Alabama, Kentucky, Louisiana, and South Carolina the regularity of the colored pupils exceeds that of the white.

Length of school term.—The colored schools are kept an average of 89.2 days in the nine States which furnish the necessary data for determining this item, and the white schools an average of 98.6 days (columns 2 and 3, Table 3). Delaware furnishes a large part of this difference, due to the colored people being left mainly to their own resources in that State. In Maryland, also, there is a considerable difference in the length of the school terms. Outside of these two States the difference is trifling.

Teachers' wages.—The average of the monthly wages of colored teachers in six States reporting this item is \$27.35; of white teachers, \$32.74 (columns 5 and 6, Table 3). This difference may be considered to proceed in part from the circumstance that among the white teachers there are a greater proportional number in the higher and better-paid grades than among the colored, thus raising their average.

In Kentucky the average wages of the colored teachers exceed that of the white. This results from the colored districts being larger than the white districts, containing more children, and therefore drawing more of the State money, which is applied exclusively to the payment of the district teacher.

THE SOURCES OF SUPPORT OF COLORED PUBLIC SCHOOLS.

In all the former slave States, except Delaware and Maryland, the annual State school revenue is apportioned impartially among all the children of the State without regard to color, so much per capita to each child. In Maryland the State school tax is apportioned among the white schools only, but a special appropriation is made from the State Treasury for the colored schools, sufficient to make the colored per capita of State moneys practically equal to that of the white. For the year 1888-89 the colored schools of Maryland received about \$100,000 from this source.

Now, as to local funds. Throughout the rural districts of the South the colored people are dependent chiefly upon this State apportionment, which is by law devoted mainly, if not exclusively, to the payment of teachers' salaries. Any additional sum required for building, repairs, fuel, or incidental expenses, or for lengthening the short school term which the State apportionment can only afford, must be raised by themselves. In the larger and more progressive cities, on the other hand, the city appropriation for schools is general, and is allotted to the various public schools, white and colored, according to the needs of each, in the judgment of the local school authorities. The State of Kentucky, however, has enacted that no white person shall be (locally) taxed for the support of a colored school, or *vice versa*. In that State the colored schools have their own trustees and district boundaries, forming an absolutely distinct system.

It is difficult, as a general thing, to determine the amounts expended for white and colored schools in cities, as these sums are not reported separately. The following instances, however, may be noted:

Richmond, Va., received from the State in 1887-88 the sum of \$28,855, of which the colored share, according to school population, was about \$12,000; yet the city paid to colored teachers, not including principals, that year \$33,513, the excess (amounting to over \$20,000), coming from the general city appropriation, and this in addition to whatever amount was expended for colored buildings, etc.

Birmingham, Ala., received in 1888-89, from the State for its colored schools, and from colored poll taxes, \$2,092. It paid for colored teachers' salaries alone \$6,250, the excess being furnished by the city; so for Selma and some other cities of Alabama.

Wilmington, Del., in 1887-88 expended \$18,745 upon colored schools, of which about \$6,000 was for building. This amount apparently all came from the general funds of the city; at most, only an insignificant sum was received from any other source.

City Superintendent W. F. Slaton, of Atlanta, says (1889):

"The Gray Street school for colored children, built and equipped during the past year, is in my opinion the best schoolhouse in Atlanta. It was built on the most modern plan; wisely arranged in regard to the admission of light; furnished with Smead's system of heating and ventilating; furnished with Andrew's best desks; supplied with maps, charts, and other aids in teaching."

State Superintendent Pickett, of Kentucky, states in his report for 1888-89 that "the receipts and expenditures of the white and colored schools are not kept separate in a number of the cities," which would seem to indicate that the Kentucky law referred to above was not observed in those cities, but that the school funds were common to both races.

Delaware makes a more meager provision for the education of colored children than any other State. There the funds raised by taxation under the State law are not apportioned impartially to the children of the State; but the taxes levied upon each race are applied to the support of schools for their own children exclusively, so that the tax upon the real and personal property and poll of colored persons is "set apart as a separate and distinct fund for the support and maintenance of colored schools, and the white tax is reserved for the white schools."

Moreover, the proceeds of the State School Fund are appropriated to white schools exclusively. For the colored schools an appropriation is made direct from the State treasury. This appropriation for colored schools has been increased from \$2,400 in 1881 to about \$5,000 in 1888.

Both the taxes levied upon colored persons and the State appropriation for colored schools are paid over to the Treasurer of the African School Society, which society, under the law, distributes it among the colored schools of the State; and by an arrangement with the county superintendents much of the work of supervising the colored schools has been left in the hands of Mr. H. C. Conrad, treasurer and actuary of the African School Society.

The amount of money actually raised for the schools of each race in 1886 (the latest year available), together with the number of white and colored children, is as follows :

Receipts of white and colored schools in Delaware in 1886.

[From Delaware School Report, 1886, pp. 5, 7, and 57.]

| | No. of children 6 to 21 years. | State appropriation. | | School taxes. | | Receipts. | |
|------------------------------------|--------------------------------------|----------------------|-------------|---------------|-------------|-----------|-------------|
| | | Total. | Per capita. | Total. | Per capita. | Total. | Per capita. |
| White..... | 36,468 | \$60,607 | \$1.63 | \$185,994 | \$5.10 | \$246,001 | \$6.76 |
| Colored (excluding Wilmington) ... | 5,750 | 4,656 | .81 | 2,511 | .44 | 7,167 | 1.25 |

The white schools thus received in appropriations and taxes more than five times as much per capita of the school population as the colored schools.

The total receipts, moreover, would allow an average of \$439 to each white school and \$104 to each colored school.

Regarding the status of the colored schools of Delaware, Superintendent L. I. Handy, of Kent County, says in his report:

"According to an understanding among the county superintendents, we have left much of the work of supervising negro schools in the hands of Mr. H. C. Conrad, of Wilmington. I have, however, devoted some personal attention to those schools in Kent County, as well as exercised a general supervision over them. On my round of visits to the white schools I have occasionally called at negro schools, and have found them in as good condition as could be expected under the circumstances. All that I have visited were entirely primary in their work. For a detailed report of these schools I must refer you to Mr. Conrad; but I desire to express the opinion that the law in regard to negro schools, passed at the last session of the legislature, and the money now appropriated by the State, are sufficient for present requirements. I say this, feeling a deep interest in the education of negro children, and appreciating the importance to the whole commonwealth of elevating in every possible way the negro race, which has been thrust into our midst by the hand of a ruthless past. It would be most unfortunate for the negro schools if they should become a bone of contention between the political parties. In advising that the present status be left unaltered at this time, I speak as a sincere friend of the negro schools. A system of good schools among the negroes can not be quickly created; it must grow. Although fully appreciating the services which Mr. Conrad has rendered the State by his labors in behalf of the negro schools, it is my intention, if the law remains unchanged and I continue in office another year, to relieve him of responsibility in regard to the negro schools of Kent County."

Where do the State funds come from? It has been stated above that in each of the Southern States, except Delaware and Maryland, the annual State fund is apportioned impartially among the white and colored children. It becomes desirable to know how much of these funds comes from colored sources. Unfortunately this is difficult to determine. The annual State fund in these States is derived in the main from the income of permanent funds, direct appropriations by the States, and taxes on property or polls, by far the major part of which, except poll taxes, would seem to come from the white population.

As regards North Carolina, State Superintendent S. M. Finger, in addressing the school officers, says: "But perhaps you say the negroes are in the way. * * * Do you know that, including poll tax which they actually pay, fines, forfeitures, and penalties, the negroes furnish a large proportion of the money that is applied to their public schools?"

In 1882, Gustavus J. Orr, then State Superintendent of Georgia, undertook an elaborate investigation, in order to determine the exact truth in this matter, and reached a conclusion regarding that State similar to that indicated by Superintendent Finger for North Carolina. He found that out of \$151,000 paid to colored teachers by the State, \$145,000 might be considered as having been contributed, directly or indirectly, by the colored people. But he called attention to another feature of the question, which must be taken into consideration, viz, that the negroes furnished nothing else toward the payment of the public expenses; or, as Superintendent Orr expressed it: "The white people, who really hold all the power of the State government in all its departments, allowed the negroes for the support of their schools more than the whole amount paid by them for all purposes, and then took upon themselves all the other expenses of the Government." And again: "It is true that colored

people contribute nearly all of what is paid [by the State] for the education of their children, as has been already shown; but they are made to do this, as has also been shown, by so selecting the sources of school revenue as to put all that they pay into the school fund." It must be acknowledged that if a due proportion of the colored poll taxes, fines, etc., were applied to other (or general) objects, their school moneys would have to be supplemented by just so much from funds proceeding from the white people; and the State of Georgia, in relieving the colored people of these general public charges, virtually applies to their education to this extent funds raised from the whites.

In Kentucky there were collected from the colored people for State taxes in 1884-85, \$13,988; there were disbursed by the State for colored schools the same year \$137,851, leaving \$123,863 as the "amount paid by white taxpayers to equalize the per capita."

It may be stated in this connection that the same year (1884-85), the colored people raised in the "counties" in Kentucky, by local taxation and subscriptions, \$19,210, and in 1888-89, \$29,044, which may be taken as a measure of their ability and inclination to raise local funds, and of the progress they have made in these particulars.

State Superintendent J. Desha Pickett says, of their effort to supplement the funds of the State: "This is prime proof of intelligent interest and of genuine progress in their system of common schools. The colored people of the Commonwealth are wide awake under the beneficent provisions in the new order of things. * * * Other proofs are presented of progress in the colored schools, which must certainly be a subject of congratulation to every thoughtful citizen of the Commonwealth, in view of the facts that the colored man is here to stay, and that the State is heavily taxed for his improvement." "That a race of people, descended a few generations back from serpent worshippers in the wilds of Africa, within less than a score of years after being freed, and out of a mass of illiterates hundreds of thousands strong, have a regularly organized system of education, conducted by more than a thousand teachers, men and women of their own race, with thrice as many trustees, and only white boards and superintendencies, county and State, is another marvel in the history of ethics, ethnology, and the education of nations. It speaks well for that race; and it speaks eloquently for Kentucky, and for the spirit of progress, not only in Kentucky, but, hopefully, throughout the South. It is the promise of a new era in the history of humanity."

GENERAL CONDITION AND PROGRESS OF THE COLORED PUBLIC SCHOOLS.

The great obstacle to the progress of the country colored schools is the poverty of the people. The State furnishes enough to pay the teacher for a two to four months' term; all the other funds, for building schoolhouses and maintaining the schools, they must generally raise themselves. On account of the lack of means the colored people are put to all sorts of shifts for buildings, often using churches, sometimes putting up with the most miserable accommodations or going without a school altogether. Such reports as the following are frequent: "Schoolhouses bad;" "The greatest trouble is want of money to build houses;" "The problem of comfortable houses for them is hard to solve;" "The colored schools of this county are at a low ebb, with no houses, and the people unable to build;" "It is almost impossible for them to build schoolhouses;" "They are too poor to build by taxation;" "Few have any tax-list, except a poll; hence the law allowing a tax to build is, for them, practically no tax at all." No doubt in some cases the want of suitable school buildings is a result of indolence or a lack of appreciation of the benefits of education, but there can be no doubt that poverty is the prevailing cause.

Other obstacles to negro education are the lack of qualified teachers and the size of the colored school districts, the latter especially in those States having a sparse colored population. Lewis County, Ky., 800 square miles in extent, forms a single colored school district. Of course in such a case it is not possible to locate the schoolhouse so that more than a few of the children can attend. The others are entirely deprived of school privileges. This condition of affairs—long distances to school—is of frequent occurrence, and it is not easy to imagine any remedy that can be devised to meet it. It is a condition of affairs that obtains in any thinly settled country, though bearing with special hardships upon the colored people, who are virtually deprived of the resource of home education.

With all these difficulties, however, the outlook is full of promise. It is only by comparing the present with the past—the schools of to-day with the condition of a people emerging from a state of human bondage and dense ignorance—that a proper estimate may be made of the ground that has been gained. Thirty years ago it was frequently an indictable offense to "teach or cause to be taught any slave or free person of color to read or write." As late as 1863, in the State of Delaware, a positive enactment was made against all assemblages for the instruction of colored people.

Now nearly one and a quarter million colored pupils daily attend the public schools and receive the rudiments of education, mainly at the expense of the white people of the South.

Further improvement is to be looked for on the lines already laid down. The teaching force is improving each year. The various colored normal, secondary, and superior institutions furnish their annual contingent to swell the ranks of the teachers. "The standing of their teachers in point of morals and learning is constantly growing better." "There is trouble securing teachers who can pass required examinations, but they are doing better on this point, and it is thought this impediment will soon disappear." Except in the event of assistance being granted by the Federal Government, it is to themselves that the colored people of the rural districts must look for means to supplement the State funds and to improve and extend their present school system. Signs are not wanting that substantial progress is being made in this direction. With the bettering of their material condition comes a fuller desire for intellectual training.

The reports of Superintendent Pickett, of Kentucky, furnish the most definite information on this point. One county superintendent says: "The (colored) common schools are improving in every respect. The grade of teachers is much better, schoolhouses are being improved, the people see that they can not get along without the common schools, but rely too much on the public fund."

Another: "Without education themselves, the colored people, with a devotion truly heroic and a self-sacrifice truly philanthropic, are making an effort to obtain for their children those blessings they have not enjoyed."

Another: "During the year a good schoolhouse has been built, and the interest is greatly increased."

Another: "The attendance during the last school year was better than ever before. A greater number of schoolhouses was built, and a larger amount supplementing the teachers' salaries was raised than ever before."

Another: "The colored people are laboring with commendable zeal to improve their schools. * * * Taxes have been levied in three districts to improve the houses."

THE NEGRO SCHOOLS OF MISSOURI.

The following information regarding negro education in Missouri is taken from the report of State Superintendent W. E. Coleman (1888-89):

"The negro schools are gradually increasing in numbers and efficiency. This may be attributed to the fact that, in addition to the teachers supplied by Lincoln institute and the high schools in the larger cities of the State, many educated negroes come to Missouri in search of positions as teachers, who have been educated in Northern States, in the same schools with the white children, but who are not permitted to teach in said States.

"Missouri has now more than 700 negro teachers employed in her public schools. These, of course, teach only negro children; but this is 700 more negro teachers than are employed in seven of the Northern States, and, in fact, more than are employed in the public schools of all the old free States.

"Experience has proven that those negroes who have lived in the South, and who are well educated, made better teachers than those who have lived altogether in the North. They get along better with both the whites and the negroes.

"Our law-makers have favored the negro children by legislation. While they do not have, as a general rule, so well-equipped schoolhouses, they are granted special privileges in other particulars that are denied to the white children of the district. To form a district for white children requires thirty children of school age; but if there are fifteen colored children in any school district the board is required and compelled to maintain a separate school for them for the same length of time the school for the white children is in session. White children who have no school facilities, who live in unorganized territory, if they attend a public school, have to pay tuition, while, at the same time, their parents are compelled to pay a four-mill school tax which goes to the organized districts of the county; but negro children, in a district with less than fifteen negro children by the last enumeration, are permitted to go to any negro school in the county free, and the district in which they reside must pay their tuition. This is not a privilege only; it is an absolute right they have under the law. Still we have a few negro fanatics, agitators, and would-be philanthropists, who are continually trying to stir up confusion and contention because a few negro children happen to live in districts remote from a negro school. They grow furious if the children have to walk two or three miles, while there are ten times as many white children who walk as far, and some farther, to attend their own district schools. The question is often asked, "How do the negro children learn?" Are they as apt as the white children? No, might be given as a definite answer; but that does not satisfy. The truth is there are not 1,000 full-blooded African children in the schools of this State. The negro population of Missouri is an amalgamated

race of people, in which the genuine negro and the Caucasian races have been mixed; and it is a fact, that can not be consistently denied, that when you have the opportunity to test the ability of the negro school children from six years old until they reach twenty it will become apparent that as they advance in the grades, from the primary department to graduation in the high school, the African characteristics drop out and the Caucasian predominate, thereby showing conclusively that the African is not capable of receiving and utilizing the school advantages afforded him with the readiness and to the extent of the Caucasian. Among the 700 negro teachers in Missouri, there are not ten of purely African antecedents.

"There are still a few communities in which the freeholders prefer to rent and lease their lands to negroes rather than to have white tenants occupy them, but who do everything in their power to deprive the negroes of their legal rights relative to schools and school privileges. The negroes are poor and can not afford to go to law, but submit, and their children are thereby defrauded out of their just rights, rights which are guaranteed to them by the laws of the State. My theory is that any community that prefers negro tenants should be compelled to support good schools for the children of such negro tenants."

CAPACITY OF THE NEGRO FOR EDUCATION.

The question of the capacity of the negro to receive education, which Superintendent Coleman touches upon in the preceding extract, has been often discussed. Mr. W. H. Baker, superintendent of the public schools of Savannah, Ga., asserted upon this point: "I desire to have it known that, as a result of my observation, which has been extensive, I am convinced that the colored people are exceedingly anxious to educate their children. The colored children in the schools of this city are making rapid progress. They not only show ability for learning what are termed the elementary branches, but seem to grasp without difficulty those studies which are included in the curriculum of what is classed as secondary education. I write this because for many years I held a contrary opinion."

The superintendent of Fleming County, Kentucky, reports: "The children advanced as rapidly as did those of the average white schools. Experience is teaching that the colored children can be almost as well educated, and in nearly the same time, as the white;" and from another county comes the following: "Colored people are taking more interest and advancing more rapidly in common school education than the whites"; and again: "The colored people greatly appreciate school privileges, and have made greater progress, under the circumstances, than have the whites."

John B. Cary, late superintendent of the public schools of Richmond, Va., in his account of the twentieth anniversary of the Richmond Colored Normal School, said: "As the subjects indicate, the exercises were of an interesting character, and clearly refuted the idea of those who maintain that the negro is incapable of mental culture. When it is known that our colored schools correspond in grades, instruction, and discipline with the white, subject to the same rules and regulations, it will be conceded, I think, that the people of Richmond are doing their full duty by them."

Some idea of the work of Central Tennessee College may be obtained from the following extract taken from the catalogue of 1889-90:

"A large portion of the students have been teachers and are at school preparing for better work. Others are getting ready to teach. Most of these have charge of Sunday schools in connection with day schools, thus aiding in the religious instruction of the communities where they labor. Hundreds of students educated here are working among their people as advocates of total abstinence from all intoxicating liquors and tobacco. Most of them are professed Christians, and infuse the Christian spirit into their work. Some are successful preachers in the different branches of Methodism, as well as in other denominations. Over 100 have been graduated in the medical department, and most of them are now practicing successfully. There are more than 5,000,000 of colored people in the South who are asking for more competent teachers, better educated lawyers, doctors, and preachers who can teach the people; better educated farmers and mechanics, and more enlightened wives and mothers to elevate the home life of the entire people."

Rev. H. M. Tupper, of Shaw University, Raleigh, N. C., says:

"Essentially the same methods and system of grading have been followed as in previous years. In the cook and dining rooms 102 girls have received instruction and been employed 1 hour per day under an experienced matron, and the improvement in order, neatness, and efficiency has been marked; also more interest and desire to excel on the part of the young ladies have been manifest than during any previous year. The same may be said in regard to the department of sewing, which is under the supervision of a very competent instructor in the different branches of needlework. Plain sewing is first taught, then cutting and putting together plain garments, the making of buttonholes; also systematic dressmaking and various kinds of fancy work. This department is well graded, and the pupils are advanced according to their proficiency. The results of the year, on the whole, have been most gratifying.

"In the male department there have been four teachers, and instruction has been given in carpentry, furniture-making, house-painting, whitewashing, kalsomining, and glazing. Others have engaged in mason work, landscape-gardening, and care of grounds. In this way we supply every want of the school, manufacturing all kinds of furniture needed, and repairing and doing any kind of carpenters' work. About 200 young men have been given instruction and employed in the different departments of industrial work, and we propose early next session to establish a printing department, as the tendency is, in some kinds of our industrial work, that the classes are crowded, making it difficult for the teacher to give the needed supervision and instruction.

"In reviewing the history of our industrial work in all its phases and bearings, *I pronounce it a grand success*, second in importance to no other department of the school, and I am doing my best from year to year to introduce such improvements as will more and more accomplish the best possible results. I find it requires experience, patience, and no little amount of firmness and energy to maintain a high standard of efficiency in the several departments of industrial work, even more effort than is necessary to secure excellence in the literary departments of the school."

Rust University, Holly Springs, Miss.:

"In the department of shoemaking twenty-eight young men have been instructed during the year, and the result proves to be in advance of our expectations.

"In the department of carpentry fifty-three young men have been instructed in the use of tools. With the advantages gained by the erection of a new industrial hall, which will be completed in a few weeks, much greater progress in both shoemaking and carpentry is promised.

"In typesetting nine young men and seven young women have worked, and not only gained knowledge under the faithful instruction of an experienced printer, but as well sent out about 1,000 copies of Rust Enterprise monthly, the work of which proves their interest and efficiency.

"The nurse-training department has done excellent work. Sixteen young women have been carefully and systematically instructed. This is a department that needs development to meet the actual demands of the times. With a prescribed course of study of 4 years we expect to make this a power for good."

LeMoyne Institute, Memphis, Tenn.:

"This school commands the confidence and respect of all. Among the best teachers in public schools in the Mississippi Valley on both sides of the river are the graduates of LeMoyne Institute."

Meharry Medical Department of Central Tennessee College, Nashville, Tenn.:

"This school has conferred the degree of M. D. on one hundred and four young men, nearly all of whom are now engaged in the successful practice of their profession. They have been kindly received by the white physicians, whose uniform testimony is that the colored physicians sent out by this school give evidence of very thorough preparation for their work.

"In each of the Southern States south of Virginia one or more of our graduates are now practicing medicine, and in quite a number of Southwestern States. Their record is one that no college need be ashamed of."

President Tupper says of the work of Leonard Medical School of Shaw University, Raleigh, N. C., and on the general subject of colored men in medicine:

"The graduates of last year more than met expectations, and won for themselves much honor before the North Carolina and Virginia State medical boards. Only one failed to pass, while others stood among the first in scholarship. Before the North Carolina medical board, in a class of some forty white applicants for license to practice medicine, one of the graduates of the Leonard Medical School led the class in six branches of medicine, but failed in two questions in chemistry. One thing has been clearly proved, that the best minds among the colored people can successfully master the different branches of medicine and make good physicians, but the medical men find it more difficult, perhaps, the fault to some extent being in their preliminary training, and in such cases the only safe remedy seems to be to allow the student to remain after the expiration of the 4 years' course until he can bring himself up to our standard of graduation."

"This is fair to the student and avoids the danger of letting loose on the community a class of graduates who have continued in school the prescribed number of years, but have not thoroughly mastered the different branches of medicine. In this connection, I wish to bear testimony that in a long experience as student and teacher I have never seen young men make so earnest and persistent efforts to succeed in their studies and qualify themselves for their profession, and we have to introduce restraints to protect their health rather than incentives to industry and study."

"During the past year we have raised the standard of qualifications for entrance into our medical school, and several who were expecting to be admitted were required to spend an extra year in preliminary studies, and yet the new class is a third larger than any preceding one."

"All of our graduates thus far have settled in the larger cities of the South, and without a single exception have readily entered into a good practice, and have the confidence of the colored people and the good-will and respect of the white physicians."

From catalogue of Atlanta University, 1889-90:

"Nearly all the graduates and many others who have left before finishing their course are engaged in teaching during a part or all of the year. Besides these, during the 4 months of the summer vacation a large number of students engage in teaching, and it is estimated that over 10,000 children in Georgia are taught annually by those who have been connected with the institution."

From report of B. T. Washington, president of the Tuskegee (Alabama) Colored Normal School:

"While the air is full of speculation as to the solution of the 'Negro problem,' it seems to me that the fact that a negro normal school of 400 students could exist for 8 years in the midst of a white community with perfect good feeling on all sides proves that the problem left to the judgment of the commonsensical and conservative among both races will soon solve itself. Education of the right kind is the only solution of the race problem."

"Eight years' experience of combining mental and industrial training proves (1) that the two can be so combined as not to hinder the mental training; (2) that enough profitable work can be done by the students to materially decrease their boarding expenses; (3) that the habits of industry growing out of an industrial training stick to the students after they graduate and prevent their becoming 'stuck-up' loafers when not teaching; (4) that the industrial training tends in the highest degree to develop moral character. The industries taught at present are farming, brick-making, wheelwrighting, blacksmithing, saw-mill work, carpentry, painting, plastering, brickmasonry, printing, mattress-making, harness-making, sewing, laundry work, cooking, and general housekeeping. Students work at these industries on an average of 1½ days in each week and are in the class-room the remainder of the time."

The catalogue of Southern University, New Orleans, La., 1889-90, says of the industrial department:

"This department, organized 4 years ago, is receiving much commendation. It has proven a success, and is a department that reflects great credit on the pupils."

"A large number of girls have learned to make garments, rugs, and household articles of various kinds. This work is regularly and systematically graded, beginning with the plain and simple and advancing to the costly and intricate. The pupils furnish their own materials."

"Students in this department are thoroughly instructed in all manner of needle-work and in cutting and fitting. Those who complete a course in this department receive a certificate stating the same. We design the addition of such industries as will afford them the means of earning an honorable and competent livelihood."

At Clark University, Atlanta, Ga., a brick building, 100 by 40 feet and two stories

high, has been erected for the industrial department. The boys are taught carpentry, wheelwrighting, painting, and harness-making. In the printing office they are instructed in that business. The girls are taught to be trained nurses, and in cooking, dressmaking, cutting, etc.

At Fisk University, Nashville, Tenn., a printing office has been furnished by a special appropriation from the John F. Slater fund, and instruction is annually given to fifteen young men in the various kinds of work that belong to a job office.

Instruction in wood-working is also given under the direction of a graduate of the mechanical department of Pennsylvania State College. Two hours each week are given to working in wood, and the results of the first year's efforts have been quite satisfactory, and the influence on general scholarship has been beneficial.

In the nurse-training department the students have been taught the right methods of caring for the sick and those who have met with accidents, and in the laws of hygiene. Instruction has also been given in cooking and in the nutritive values of the different foods and their comparative cost. Dressmaking and plain sewing have also been taught.

The catalogue for 1889-90 of Atlanta University contains a list of the graduates from 1871 to 1889, inclusive, and also the business of each, so far as learned. Of the 148 persons whose names are given, 120 are teachers, 9 preachers, and 19 are engaged in other pursuits.

"The boys of the college, college preparatory, and normal classes, and the first two grades of the grammar school course, are taught the use of tools.

"The boys are also taught some of the principles of farming and gardening. Attention is given to the raising and care of stock, to the raising of fodder crops, their comparative value and fitness for this soil and climate. The cultivation of vegetables is encouraged by competition and prizes for the best results.

"The girls are taught various branches of household science, such as plain sewing, dressmaking, cooking, and nursing the sick, under experienced teachers.

"An outfit of type and other printing material has been purchased for instruction in printing, and additions of material will be made as our funds allow.

"Classes in printing have been organized, a monthly paper, the *Bulletin*, has been issued, and most of the job printing of the institution has been done by student labor."

In New Orleans University facilities are afforded for the daily instruction of 50 young men in carpentry, cabinet-making, and upholstering. A printing office has also been opened, in which all the work of a job office will be taught. The girls receive instruction in dress cutting and making. In the nurse-training department a full course of instruction is given in everything properly belonging to that department.

ALABAMA.

Separate schools for the two races are required. (Sch. L's, 1885, p. 29, sec. 52.) Also required by the Constitution. (Sch. L's, 1885, p. 3, sec. 1.)

The poll taxes (\$1.50 on each male citizen between 21 and 45 years of age, collected in each county, shall be retained therein for the public schools thereof. (Sch. L's, 1885, p. 6, par. 6.)

Poll taxes paid by each race in each township or school district must be used for that race in that township or district. (Sch. L's, 1885, p. 32, sec. 60.)

The State superintendent of education shall apportion the school fund according to school population to each township or district, and for each race therein. (Sch. L's, 1885, p. 30, sec. 56, *et seq.*)

The whole amount apportioned in 1888-89 was \$370,420.56, of which the 273,994 white children received \$204,911.93, and the 212,931 colored children received \$165,508.63; 74.8 cents for each white child and 77.7 cents for each colored child. (Sch. Rep., 1889, p. 107.) The whole amount disbursed, including local funds, was \$690,390.22 (p. 10).

According to the school laws published in 1835 (p. 12) the teachers were paid by the county superintendents quarterly. It seems that by the present laws they are paid directly from the State treasury, the county superintendents simply delivering the money sent to each teacher. (Rep. of 1833, p. 27, and Rep. of 1886, p. 19.)

"All local school funds raised for the support of public schools, by taxation or otherwise, shall be apportioned and expended in the district or districts where such funds have been raised, under such rules and regulations as the district superintendent of public schools of said district, or other local board provided by law, may prescribe; but this section shall not be construed to repeal any provision for the apportionment and disbursement of the moneys mentioned in this article [Art. VII], provided for in special or local laws" (Sch. L's, 1885, p. 34).

In addition to the \$165,508.63 apportioned to the colored schools, they were entitled to the poll taxes paid by colored voters. From these funds colored teachers were paid \$201,217.82, and, in addition, \$7,000 were paid to colored normal schools. (See Rep. 1889, p. 10.) This gives \$1.14 to each white child and 93 cents to each colored

child. It is probable that a larger proportion of the colored voters failed to pay the poll tax, as was true in North Carolina, where a record was kept of the poll-tax receipts from each race.

The apportionment in 1886-88, was as follows: White children (251,606), \$190,-182.45, or 76 cents for each; colored children (201,331), \$156,634.87, or 78 cents for each. (See Rep. 1888, p. 100.)

The disbursements of State fund, including poll tax, was as follows: White teachers and normal schools, \$304,384.40, or \$1.21 for each child. Colored teachers and normal schools, \$207,380.42, or \$1.03 for each child. (See Rep. 1888, p. 8.)

"In making the apportionment of school money to the several school districts the superintendent of education shall first set apart to each township or other school district the amount due from the State to each district as interest on its sixteenth-section fund, or other trust fund held by the State; and all townships or school districts which have an income from trust funds in the hands of the State, or from lease or sale of their sixteenth-section lands, shall not receive anything out of the balance of the educational fund to be apportioned until all other townships or school districts having no trust fund shall have received from the general fund such sum as will give them an equal per capita apportionment with the townships and districts having such trusts and incomes.

"The superintendent of education shall apportion the educational fund to the respective townships or school districts subject to the provisions of the preceding section, according to the latest official returns of the enumeration of school population of the townships or other districts which have been made to his office; and he shall also apportion the fund for each township between the races therein; but whenever the superintendent of any township or district has failed to make and return the census enumeration of his township or district, as required by law, the superintendent of education shall make the apportionment to such township or district according to the best information he can obtain as to the school population of such townships or district; but in no event shall he, in case of such failure, estimate the school population of any such district or township at more than the number shown by the last official report thereof to his office.

"As soon as the superintendent of education shall have made the apportionment of school money as hereinabove provided, he shall record the same in his office in books kept for that purpose, showing the amount which he has apportioned to each school district in the State, and specifying from what source or sources the same was derived, the amount to each race in the township, and the number of children of each race in the district upon which the apportionment was based; and he shall then furnish to each county superintendent of education a certified copy from such books, showing the dividends of educational fund to each township or district under the supervision of such county superintendent of education, and the amount so divided and certified shall be the total amount which each of such school districts shall be entitled to receive from the State, except the poll tax, during the then current scholastic year; and no contract to pay for any school or schools, for any district, more than the amount thus apportioned to it, together with such poll tax as it may receive, and such funds as may be in hand from previous years, shall be valid against the State or township." (pp. 30-31, secs. 55-57.)

ARKANSAS.

"He [the State superintendent] shall, on the first Monday of July and on the first Monday of January of each year, make a pro-rata apportionment to the several counties of the State of the remaining revenues in the State treasury available for distribution for school purposes, on the basis of the number of persons between the ages of six and twenty-one years residing in the said counties, respectively, on the first Monday of July previous; and he shall publish a statement of the same, and as early as practicable shall transmit a copy thereof to each county examiner, and to each of the several treasurers in the State, and to each county clerk, who shall submit the same to the county court at its next term; and he shall thereupon draw his requisition on the State auditor in favor of the treasurers of the several counties for such amounts as the said counties may be entitled to receive for the support of free common schools." (Sch. L's, 1889, p. 16.)

"The county court, immediately on receiving notice of the distributive share of school revenue apportioned by the State superintendent to each county, shall proceed to apportion to the several school districts of the county, in proportion to the number of persons between the ages of six and twenty-one years residing within the school district, respectively, on the first Monday of July previous, the said school revenue apportioned to the county, and shall forward to the county treasurer, and to each of the directors of each district, a statement of such apportionment, carefully distinguishing the sources from which the school revenue so apportioned are

derived, and the amount due each school district in the county from each separate source, and shall see that the revenues from the public-school fund are invariably paid to the county and to the school district strictly in accordance with the apportionment made to them." (Sch. L's, 1889, p. 20.)

"The said board [of district directors] shall make provision for establishing separate schools for white and colored children and youths, and shall adopt such other measures as they may judge expedient for carrying the free-school system into effectual and uniform operation throughout the State, and providing, as nearly as possible, for the education of every youth." (Sch. L's, 1889, p. 30.)

The teachers are paid by the county treasurers, on warrants of the district board of directors. (Sch. L's, 1889, p. 38.)

The reports for the years 1885-88 do not show the amounts distributed to white and colored schools separately.

DELAWARE.

"The levy courts in the several counties of this State are authorized and required, annually, in the month of April, to lay and apportion a tax of thirty cents in the hundred dollars, and so pro rata, upon the assessments of the real and personal property and poll of colored persons, as they shall stand upon the assessment lists of the several hundreds, which shall be set apart as a separate and distinct fund for the support and maintenance of colored schools in this State. The warrant required to be issued to the collectors of the several hundreds shall include the taxes levied under this act. The said taxes shall be collected by the collectors aforesaid, by the same process as other taxes now are, and [they shall] pay over the same as hereinafter directed.

"All moneys collected under this act shall be paid as other taxes to the county treasurer in each county, which he shall keep as a separate fund, and which shall be paid by him to the treasurer of the 'Delaware Association for the Education of Colored People;' and at the time of each and every payment he shall furnish the association with a statement showing the respective amounts received by him from the different hundreds of his county. The fund arising under the provisions of this act and paid to said association shall be applied to the support and maintenance of colored schools throughout this State, and shall be distributed by said association as follows, to wit: The said association shall take the statement furnished by the county treasurer and distribute to each hundred the amount paid to the treasurer by each hundred, under the provisions of section 1 of chapter 48, vol. 15. And in case there shall not be any school kept and maintained in any hundred during any year, the amount paid in from said hundred shall be retained and held by said association until a school or schools shall be organized and kept in each hundred, when it shall be applied toward the support of such school or schools." (Sch. L's, 1881, p. 37.)

In 1888 the State also made a direct appropriation of \$5,364 for the colored schools, which was \$1.50 for each one of the 3,570 colored children enrolled in schools. The number of white children enrolled in 1886 was 29,421; the amount of State appropriation was \$60,606.52, or \$2.06 for each child enrolled. (See Rep. 1887.)

FLORIDA.

"Provision shall be made by law for the distribution of the common-school fund among the several counties of the State in proportion to the number of children residing therein between the ages of four and twenty-one years." (Constitution, Art. VIII, sec. 7, as found in the Sch. L's, 1885, p. 4.)

"The superintendent of public instruction shall annually apportion the interest on the common-school fund, and the fund raised by the one-mill tax,* authorized by sections 4 and 5 of Article VIII of the Constitution, among the several counties of the State, in proportion to the number of children residing therein between the ages of four and twenty-one." (Sch. L's, 1885, p. 8.)

The county board of public instruction is required "to apportion moneys to the different schools in proportion to the average attendance of pupils: *Provided*, That reasonable exception may be made in favor of small schools in neighborhoods where the number of youth who should attend is small and their average attendance at school ranges high." (Sch. L's, 1885, p. 10.)

The county board of public instruction are also required "to locate and maintain schools in every locality in the county where they may be needed, to accommodate, as far as practicable, all the youth between the ages of six and twenty-one years during not less than three months in each year." (Sch. L's, 1885, p. 9.)

The school reports of 1889 and 1890 do not contain tables giving the appropriations for white and colored schools separately.

* The one-mill tax fund is now retained in the counties. (p. 24.)

GEORGIA.

"It shall be the duty of the State school commissioner to disburse the common-school fund in the following manner: He shall annually apportion equitably the State school revenue to the different counties of the State upon the basis of the aggregate of children between six and eighteen years of age in each county. After the annual apportionment of the State school fund has been made, and when the county school commissioner of any county shall give official notice to the State school commissioner that the common schools of his county are within three weeks of closing, the latter named officer shall execute an order on the tax collector of the county in favor of the county school commissioner for the quota of the common-school fund apportioned to the county, signing the order officially and affixing thereto his seal of office, and transmit the same to the county school commissioner." (Sch. L's, 1889, p. 7, sec. 8.)

"The State school commissioner shall send the notice of apportionment to the tax collector of each county as soon as the apportionment is made, and it shall be the duty of the tax collector to retain in his hands, of the taxes first collected, a sufficient amount to pay the sum mentioned as the county's quota in the notice of apportionment, and to pay the same to the county school commissioner as soon as the order of the State school commissioner is presented. (*Ibid.*, p. 7, sec. 9.)

"The academic and calendar or civil years shall be coincident, and it shall be the duty of the school commissioner, by the 15th day of January of each year, or as soon thereafter as practicable, to communicate to the county board of education of each county an approximate estimate, computed upon the same basis as that mentioned in section eight of this act, of the pro rata part of the State school fund falling to said county for that year, and as soon thereafter as the county board shall communicate satisfactory evidence to the State school commissioner that arrangements have been made by them, by taxation or otherwise, for continuing the common schools, free to all, in operation for at least three months in the year throughout the entire county, as hereinafter provided, said county shall be deemed and held entitled to draw her proportionate part of the State fund through the appointed channels whenever said fund is ready for distribution." (*Ibid.*, p. 18, sec. 3.)

"The apportionment of the State school fund required by the eighth section of this act shall be made by the State school commissioner each year by the first of July, or as soon thereafter as practicable, and when the funds drawn under that apportionment, as well as any other school funds raised by local taxation, are placed in the hands of any county [school] commissioner, he shall be holden for all amounts so received upon his official bond as treasurer, and shall disburse the same only upon the order of the county board of education, and the said county commissioner shall not be entitled to compensation for receiving any school funds but as provided herein." (*Ibid.*, p. 19, sec. 42.)

"It shall also be the duty of said [county] board of education to make arrangements for the instruction of the children of the white and colored races in separate schools. They shall, as far as practicable, provide the same facilities for both races in respect to attainments and abilities of teachers and length of term-time; but the children of the white and colored races shall not be taught together in any common or public school of this State." (*Ibid.*, p. 11, part of sec. 21.)

The school reports for the years 1887-1890 do not show the amounts paid to white and colored schools separately.

KENTUCKY.

"The superintendent of education shall, on or before the first day of July in each year, ascertain and estimate for the school year the *pro rata* share each child will be entitled to, according to the whole number of children between the ages of six and twenty years in the State, and the proportion thereof each county and each school district will be entitled to according to the whole number of such children residing in each county and each school district respectively, as shown by the returns of the county superintendent. If at the time of making such estimate and apportionment the census returns of the superintendent for any county have not been made to him, he shall use the census returns made for the previous year. It shall be the duty of the auditor to furnish the superintendent of public instruction such data as may be needed in making said estimate and apportionment. It shall be the duty of the superintendent of public instruction, on or before the first day of July, to file a copy of said estimate and apportionment with the auditor, and to inform each county superintendent of the amount to which each school district of his county will be entitled. Whatever difference may exist between the estimated and the actual revenue of the school fund for any school year shall be taken into the account of the estimate and apportionment for the succeeding school year." (Sch. L's, 1886, p. 8, sec. 8.)

"The county superintendents shall pay the teachers their salaries direct, upon the certificate of the trustees that the school has been taught." (Sch. L's, 1886, p. 28, sec. 21.)

"Colored school trustees for each colored school district shall be elected at the same time and in the same manner that white trustees are elected: *Provided, however*, That no tax shall be levied upon the property or poll, or any services required of any white person for the benefit of a school for colored children, and no tax shall be levied upon the property or poll, or any services required of any colored person for the benefit of a school for white children. And no colored person shall be allowed to vote for a trustee of a white school; and no white person shall be allowed to vote for a trustee of a colored school. It shall not be lawful, under any of the provisions of this act, for any white child to attend any common school provided for colored children, or for any colored child to attend any common school provided for white children." (Sch. L's, 1886, p. 49, sec. 3.)

"By act of April 24, 1882, the annual 'capitation tax of one dollar on each male colored person above the age of twenty-one years,' for the benefit of the colored schools, was repealed by the general assembly. In view of the tax being confined to the colored people, although exclusively for the benefit of the colored schools, it had been pronounced unconstitutional by the United States district court. The abolition of this tax, which had been the most fruitful source of support to the colored schools, was the main cause of the reduction of the auditor's estimate of \$41,644.52 for the school year 1882, to \$12,007.78 for the school year 1883, which alone, not deducting the contingent expenses of the department, would have yielded a *per capita* of only \$0.13. Just at this crisis the act levying an additional 'tax of two cents on each one hundred dollars of property in this Commonwealth subject to taxation for State revenue purposes,' for the benefit of the common-school fund, equalizing the *per capita* and the school ages for the white and the colored school children, was submitted by authority of the general assembly to the qualified voters of the Commonwealth for their ratification or their rejection. The act was confirmed by the people at the polls." (Sch. Rep., 1886, p. 2.)

The apportionments have been as follows:

In 1885, to the 514,167 white children of school age, \$796,958.85; to the 97,839 colored children of school age, \$151,650.45, or \$1.55 to each white and colored child.

In 1886, to the 524,274 white children, \$865,052.10—\$1.65 for each; to the 99,654 colored children, \$164,429.10—\$1.65 for each. (Sch. Rep., 1886, pp. 21, 22.)

In 1888, to the 549,592 white children, \$1,044,224.80—\$1.90 for each; to the 107,144 colored children, \$203,573.60—\$1.90 for each.

In 1889, to the 555,822 white children, \$1,139,435.10—\$2.05 for each; to the 109,518 colored children, \$223,773.90—\$2.05 for each.

In 1890, to the 565,451 white children, \$1,215,719.65—\$2.15 for each; to the 111,355 colored children, \$239,413.25—\$2.15 for each. (Sch. Rep., 1888-89, Statis. Tables.)

LOUISIANA.

"The State superintendent of public education shall quarterly, on the first Monday in March, June, September, and December, in each year, apportion the funds appropriated by the general assembly for the support of the common schools of the State, among the several parishes of the State, according to the number of children between the ages of six and eighteen years in each parish: *Provided, however*, That all the poll tax collected in any parish shall be appropriated to said parish. The amount so apportioned shall be paid by the State treasurer to the school treasurer of each parish upon the warrant of the State superintendent of public education." (Act No. 81, 1888, p. 11, sec. 53.)

"The parish board of directors" shall apportion the school fund to the several districts in the parish in proportion to the number of persons in the district between the ages of six and eighteen years, and shall determine the number of schools to be opened, the location of the schoolhouses, the number of teachers to be employed, their salary; and the said school board is entrusted with seeing that the provisions of the law are complied with." (P. 2, sec. 7.)

"The parish treasurer in every parish (the parish of Orleans excepted) shall be and is constituted the treasurer of all school funds apportioned by the State to such parish, or raised, collected, or donated therein for the support of the free public schools; he shall receive and receipt for all such funds to the treasurer of the State, and to the collector of parish taxes." (P. 12, sec. 56.)

"Said treasurer [of the parish] shall pay out the school funds intrusted to his charge only on warrants drawn by the president and countersigned by the secretary of the parish school board, and shall state against what school district fund it was drawn, which warrants shall be drawn by these officers only in virtue of appropriations regularly made by the parish board." (P. 12, sec. 59.)

The school reports for the four years 1886-1889 do not show the amounts expended for white and colored schools separately.

Average duration of white schools :

| | Months. |
|---------------|---------|
| In 1883 | 4.75 |
| In 1889 | 5.50 |

Average duration of colored schools :

| | |
|---------------|------|
| In 1888 | 4.55 |
| In 1889 | 4.72 |

(Sch. Rep., 1888-89, p. 147.)

MARYLAND.

CHAPTER XVIII.—Schools for Colored Children.

"SECTION 1. It shall be the duty of the board of county school commissioners to establish one or more public schools in each election district for all colored youth between six and twenty years of age, to which admission shall be free, and which shall be kept open as long as the other public schools of the particular county : *Provided*, The average attendance be not less than fifteen scholars.

"SEC. 2. Each colored school shall be under the direction of a special board of school trustees, to be appointed by the board of county school commissioners, and shall be subject to the same laws for its government and furnish instruction in the same branches as the schools for white children.

"SEC. 3. The comptroller shall apportion the sum appropriated for the support of the colored schools of the several counties and the city of Baltimore in proportion to their respective colored population between the ages of five and twenty years, said apportionment to be made at the time he apportions the levy for the white schools.

"SEC. 4. The total amount of taxes paid for school purposes by the colored people of any county, or in the city of Baltimore, together with any donations that may be made for the purpose, shall also be devoted to the maintenance of the schools for colored children." (Sch. L's, 1874, p. 27.)

"As soon as the comptroller shall have received from the city of Baltimore and the several counties returns of the amount of the State school tax levied in each county and the city of Baltimore, he shall immediately thereafter apportion the amount of the whole levy to the several counties and the city of Baltimore, in proportion to their respective population between the ages of five and twenty years." (Sec. 5, p. 28.)

In 1888-89 the amount of the State school tax appropriated for the 226,806 white children was \$405,001.02, which was \$1.78 for each white child; the amount appropriated for colored children was \$118,049.77, which gave \$1.72 for each one of the 68,409 colored children. It is not shown whether any part of the free-school and academic funds was given to the colored schools, but it appears that none of it was so bestowed. (Sch. Rep., 1889, p. XLIX.)

The legislature enacted in 1888 "that the sum appropriated to colored schools shall be raised from \$100,000 to \$125,000 : *Provided*, That if the amount paid into the treasury on account of the tax for public schools shall not amount to \$125,000, then the amount distributed to colored schools in excess of \$100,000 shall only be the amount paid into the treasury from said tax in excess of \$500,000." (Sch. Rep., 1888, p. X.)

The amount appropriated for the 226,806 white children in 1887-88 was \$398,744, or \$1.76 for each child; the amount appropriated for the 68,409 colored children was \$98,016.12, or \$1.43 for each child. (Sch. Rep., 1888, p. LXIV.)

MISSISSIPPI.

"All school funds shall be divided *pro rata* among the children of school ages." (Art. 10 of Const., sec. 10.)

"The school board shall have full power to lay off or alter the school districts of the county, and they shall make separate districts for the two races. In each district thus established, one school shall be maintained for at least the constitutional period of four months in each year." (L's, 1890, p. 16, sec. 40.)

It shall be the duty of the county treasurer "to receive and receipt for all moneys on account of school funds of the county; to pay money out of the common-school fund upon the order of the county superintendent of education, approved by the board of supervisors, except in case of teachers' warrants, which shall be paid upon approval of the superintendent aforesaid, upon the warrant of the clerk." (P. 23, sec. 72.)

"The auditor of public accounts shall annually, on the second Monday in July and January, or failing therein, as soon thereafter as practicable, distribute among the several counties of the State all the common-school fund available for that purpose, said distribution to be *pro rata*, according to the number of educable children in each county, respectively." (P. 22, sec. 70.)

The school report of 1888-89 does not show what proportion of the \$300,000 distributed by the State was used for the colored schools; but of all receipts from State, county, and city taxes, poll taxes, and other sources, the colored teachers received \$341,562.86, and the white teachers \$589,400.44. The number of colored children enumerated was 272,682, and the number of white children was 191,792.

MISSOURI.

"The State superintendent of public schools shall, annually, in the month of July, apportion the public-school fund applied for the benefit of the public schools among the different counties upon the enumeration and returns made to his office, and shall certify the amount so apportioned to the State auditor, also to the county clerk of each county, stating from what sources the same is derived, which said sum the several county treasurers shall retain in their respective county treasuries from the State fund; and the county clerks shall, annually, during the month of August, according to the enumeration and returns in their offices, proceed to apportion the school funds for their respective counties; and no district, city, or town which shall have failed to make and return such enumeration shall be entitled to receive any portion of the public-school funds; and in making such distribution each county clerk shall apportion all moneys collected on the tax duplicate of any district for the use of schools to such district, all moneys received from the State treasurer, and all moneys on account of interest of the funds accruing from the sale of section sixteen, or other lands in lieu thereof, to the district schools in the Congressional townships and parts of Congressional townships to which such land belonged, and all other moneys for the use of schools in the county and not otherwise appropriated by law, to the proper district; and he shall, immediately after making such apportionment, enter the same in a book to be kept for that purpose, and shall furnish the district clerks and those of cities or villages, as the case may be, each with a copy of said apportionment, and order the county treasurer to place such amount to the credit of the district, city, or town entitled to receive the same: *Provided, further,* That no district, city, or town that shall have failed to afford the children thereof the privileges of a free school for at least six months during the year ending the 30th day of June previous to said distribution, provided a tax of forty cents on the one hundred dollars assessed valuation together with the public funds will maintain the same, shall be entitled to any portion of the public school fund for that year.

"The county court of each county shall, at its August term in every year, apportion the county public-school moneys among the several districts in the county, according to the enumeration of the pupils resident therein." (Sch. L's, 1889, secs. 8064, 8065.)

"The county treasurer in each county shall be the treasurer of all moneys for school purposes belonging to the different districts until paid out on warrants duly issued by order of the board as authorized by this chapter, except in counties having adopted the township organization law, in which counties the township trustee shall be the treasurer of all school moneys belonging to the township, and be subject to corresponding duties as the county treasurer." (Sec. 8072.)

"Separate free schools shall be established for the education of children of African descent; and it shall hereafter be unlawful in the public schools of this State for any colored child to attend any white school, or for any white child to attend a colored school.

"When there are within any school district in this State fifteen or more colored children of school age, as shown by the last enumeration, the school board of such school district shall be, and they are hereby, authorized and required to establish and maintain within such school district a separate free school for said colored children; and the length of the school term for said colored children and the advantages and privileges thereof shall be the same as are provided for other schools of corresponding grade within such school district, and the board shall in all cases conduct, manage, and control said school as other schools of the district are conducted, managed, and controlled; and all indebtedness incurred by said board in providing suitable buildings, employing teachers, and maintaining said school shall be paid for out of the appropriate funds of the district upon warrants ordered and issued in conformity with the provisions of sections 8016 and 8017 of this chapter: *Provided,* There be no school building in such school district for said colored children, the board shall be and they are hereby authorized and required to rent suitable buildings and furnish the same, and all expenses necessarily incurred shall be paid out of any funds to the credit of the building or incidental fund of such school district. Should any school board neglect or refuse to comply with the provisions of this section, such school district shall be deprived of any part of the public funds for the next ensuing school year.

"When the number of colored children of school age residing in any school district, as shown by the last enumeration, shall be less than fifteen, they shall have the privi-

lege and are entitled to attend school in any district in the county wherein a school is maintained for colored children, and the school board of the district in which such colored children reside shall reserve a sufficient amount from the teachers' fund of such district to pay the expense thus incurred for such school year; but such colored children shall only be entitled to attend school for the same length of time that other schools of the district in which they reside are maintained, and at the end of the school term the school board of the district in which such children may have attended school shall make out and forward to the school board of the district in which such children reside an account showing the amount due for said colored children, said amount to be equal to the *pro rata* expense of such attendance, the same to be prorated according to the amount paid for teachers' wages and incidental expenses during such school term; and the school board of the district in which such children reside shall issue an order on the county or township treasurer to transfer said amount to the credit of the teachers' fund of the district in which said children attended school. Any school board neglecting or refusing to comply with the provisions of this section shall be held individually responsible for the amount due the district in which said colored children attended school." (Secs. 8002-8004.)

The school reports do not show how much of the school fund was expended for colored schools.

NORTH CAROLINA.

"The State board of education shall, on the first Monday in August of each and every year, apportion among the several counties of the State all the school funds which may be then in the treasury of the said board, and order a warrant for the full apportionment to each county, which said apportionment shall be made on the basis of the school population." (P. 5, sec. 2535, of *Bien. Rep.*, 1889-90.)

"Upon the receipt of the requisition of the treasurer of any county, duly approved by the chairman and secretary of the county board of education, for the school fund which may have been apportioned to said county, the State board of education shall issue its warrant on the State auditor for the sum due said county, whereupon the said auditor shall draw his warrant on the treasurer of the State board of education in favor of such county treasurer for the amount set forth in the warrant of the said State board." (*Ibid.*, p. 6, sec. 2537.)

"The State treasurer shall receive and hold as a special deposit all school funds paid into the treasury, and pay them out only on the warrant of the State auditor, issued on the order of the State board of education in favor of a county treasurer, duly indorsed by the county treasurer in whose favor it is drawn, and it shall be the only valid voucher in the hands of the State treasurer for the disbursement of school funds." (P. 6, sec. 2538.)

"The county board of education shall consult the convenience of the white residents in settling the boundaries of districts for the white schools, and of colored residents in settling boundaries for colored schools. The schools of the two races shall be separate; the districts the same in territorial limit or not, according to the convenience of the parties concerned. In cases where there are two sets of districts in a county, they shall be designated as school district number one, two, three, etc., for white schools, or school district number one, two, three, etc., for colored schools, in the county of ——" (P. 14, sec. 2550.)

"The county board of education of every county shall, on the first Monday of January of each year, apportion among the several districts of the county, designating the amount to each schoolhouse, if more than one in the district, all school funds in the following manner: First, deduct an amount sufficient to defray the general school expenses of the county authorized by law; then apportion two-thirds of the funds to the several districts in proportion to the whole number of children between the ages of six and twenty-one years, and at the same time the remaining one-third shall be apportioned in such manner as to equalize the average length of school terms for the two races as far as may be practicable, without discrimination in favor of or to the prejudice of either race. As soon as the apportionment is made the county board of education shall post a statement at the court-house door showing the amount apportioned to the several districts or schools of the county, and they shall also notify each committee of the amount apportioned to their district and to each school. The board shall also furnish the treasurer of the county board of education a statement of the amounts apportioned to the several districts and schools." (P. 14, sec. 2551.)

"The county treasurer of each county shall receive and disburse all public-school funds." (P. 17, sec. 2554.)

"All orders upon the treasurer of the county board of education for school money for the payment of teachers, and all orders for the purchase of sites for schoolhouses, and for the cost of building, repairing, and furnishing schoolhouses, shall be signed by the school committee of the district in which the school is taught, or in which the site or schoolhouse is situated, and shall be countersigned by the county superintendent of public instruction, which orders, duly indorsed by the person to whom the

same are payable, shall be the only valid vouchers in the hands of the treasurer of the county board of education, to be paid out of the funds apportioned to the district." (P. 17, sec. 2555.)

"It shall be the duty of the treasurer of the county board of education to keep a book, in which he shall open an account with each public-school district in the county, showing the amount apportioned to said district, distinguishing the moneys due to the white and the colored districts, the date of all payments of school moneys, the name of the person to whom paid and the several amounts. He shall balance the accounts of each district annually, on the thirtieth day of June in each and every year, and shall report by letter or printed circular, within ten days after each apportionment, to each school committee, the amount apportioned to the respective districts for the year, together with the balance which may be due any of the said districts from the preceeding year." (P. 18, sec. 2556.)

"Between the ages of six and twenty-one years we had by last census 536,663 children—370,144 white and 216,524 colored. This shows 63 per cent. to be white and 37 per cent. colored, or about five-eighths white and three-eighths colored.

"In 1890 we spent for the whites \$475,177.63, and for the colored \$242,047.77. This shows 66 per cent. of the funds spent for the whites and 34 per cent. for the colored. The average amount on each child throughout the State is \$1.22, and on the total population only 44 cents." (Supt.'s Rep., 1890, p. XLVII.)

The expenditures above named include the sums received for poll taxes, local taxes, etc., some of which are not required to be distributed according to the regulations mentioned.

Of the amount *apportioned* to the schools, the white schools received \$357,439.33, and the colored schools received \$175,829.43; this gives 97 cents for each white child and 81 cents for each colored child. (P. 57.)

The amount received from poll taxes forms part of the State fund and is distributed in like manner.

In 1888-89 the total school expenditures for white and colored children of funds received from all sources, State and local, omitting cost of supervision and treasurer's commissions were as follows:

| | Whites. | Colored. |
|-------------------------|----------------|----------------|
| Tuition | \$283, 665. 74 | \$143, 106. 94 |
| Houses and sites | 34, 599. 98 | 17, 026. 06 |
| County institutes | 445. 97 | 249. 50 |
| Total | 318, 711. 69 | 160, 382. 50 |

The amount therefore expended for each of the 363,982 white children was 88 cents, and the amount expended for each of the 216,837 colored children was 74 cents.

SOUTH CAROLINA.

"He [county school commissioner] shall annually, on the first day of February, or as soon as practicable thereafter, apportion the income of the county school fund among the several school districts of his county in proportion to the average number of pupils attending the free public schools in each district, and he shall certify such apportionment to the county treasurer." (P. 12, sec. 1002 of Sch. L's, 1889; also p. 19, sec. 1015.)

"The several county treasurers shall retain all the poll tax collected in their respective counties, and it is hereby made the duty of the said county treasurers in collecting the poll tax to keep an account of the exact amount of said tax collected in each school district in his county, and the city of Charleston shall, for the purposes of this section, be deemed a school district, and the county treasurer shall pay over to the city board of school commissioners the amount of poll tax collected in said city, and the poll tax collected therein shall be expended for school purposes in the school district from which it was collected." (P. 22, sec. 1021.)

"It shall be the duty of each county treasurer to report monthly, on the fifteenth day of each month, to the county school commissioner of his county, the amount of collections and disbursements made by him for the month on account of poll tax and all other school funds." (Sec. 1022.)

"The board of trustees in each school district shall take the management and control of the local educational interests of the same, subject to the supervision of the county board of examiners, and shall visit each school at least once in every school term." (P. 17, sec. 1010.)

The school reports for the years 1888 to 1890 do not show the amounts paid to white and colored schools separately.

TENNESSEE.

"All moneys in the treasury of the State for the annual support of her schools on the first Monday in October and April of every year shall be apportioned by the comptroller among the several counties according to their scholastic population as reported to him by the State superintendent. He shall give immediate notice of such apportionment to the county trustee of each county, and shall give notice in some newspaper at the seat of government of the amount apportioned to each county. He shall issue his warrant on the treasurer in favor of the county trustee of each county for the amount apportioned to such county and transmit the warrant to such trustee." (P. 17, sec. 42 of Sch. L's, 1889.)

"When the money derived from the school fund and taxes imposed by the State on the counties shall not be sufficient to keep up a public school for five months in the year in the school districts in the county, the county courts shall levy an additional tax sufficient for this purpose, or shall submit the proposition to a vote of the people, and may levy a tax to prolong the schools beyond the five months, said tax to be levied on all property, polls, and privileges liable to taxation, but shall not exceed the entire State tax."

"Taxes so levied by the county shall be collected in the same manner as other county taxes, and shall be paid over to the county trustee for distribution among the school districts of the county according to their scholastic population." (P. 17, secs. 39, 40.)

"Every male inhabitant in the State subject thereto shall pay a poll tax of one dollar for the support of the public schools, which shall be collected as other taxes are, and paid over to the county trustee in the county where collected, and distributed therein to each school district according to scholastic population." (P. 16, sec. 36.)

"A tax of one and one-half mills on the dollar shall be, and is hereby, annually assessed upon all property subject to taxation, for the support of the public schools, which shall be collected as other taxes are, and paid over to the county trustee in the county where collected, and distributed therein to each school district according to scholastic population." (P. 16, sec. 38.)

It is the duty of the district directors "to use the school fund apportioned to their district, derived from donations or other sources, in such manner as will promote the interest of public schools in their respective districts." (Sec. 5, p. 10.)

"To keep separate and apart schools for white and colored children." (Sec. 9.)

"The public schools shall be free to all persons between the ages of six and twenty-one years residing within the school district, and in special cases those children residing in different districts may be educated in schools under such regulations as may be prescribed by the directors of the district interested: *Provided*, That white and colored persons shall not be taught in the same school, but in separate schools, under the same general regulations as to management, usefulness, and efficiency." (P. 14, sec. 30.)

The school reports for the years 1887 to 1889 do not show the amounts apportioned to white and colored schools separately.

TEXAS.

"Separate schools shall be provided for the white and colored children, and impartial provision shall be made for both." (P. 4, sec. 7 of Sch. L's, 1889.)

"All available public-school funds of this State shall be appropriated in each county for the education alike of white and colored children, and each race shall receive its just pro rata according to scholastic census." (P. 7, sec. 3.)

"The State board of education shall, on or before the fifteenth day of July of each year, make an apportionment of the available school fund among the several counties of the State, and to the several cities and towns constituting separate school organizations, according to the scholastic population of each, and the State superintendent shall deliver an abstract of such apportionment to the comptroller and to each county judge and mayor of each city or town that has control of the public schools, a statement of the amount apportioned to their county, city, or town, as the case may be, and he shall issue to the county treasurer of each county, and to the city treasurer of any city or town having control of the public school, a certificate for the amount of the available school fund so apportioned to each county, city, or town, which certificate shall be signed by the governor as president of the board of education, countersigned by the comptroller of public accounts, and attested by the secretary." (P. 10, sec. 3.)

"The State treasurer shall receive and hold as a special deposit all moneys belonging to the available school fund and keep an account of the several sources from which they accrue. He shall open and keep an account with every county, city, or town in the State to which the board of education issues a certificate, (showing there

to be entitled to receive any portion of the available free-school fund), wherein he shall credit each such county, city, or town with the amount apportioned to them by such certificate, and duplicates of all such certificates shall be furnished the State treasurer at the time of the issuance thereof by the board of education." (P. 11, sec. 3.)

"The treasurers of the several counties shall be treasurers of the available public free-school fund for their respective counties." (P. 14, sec. 7.)

"The county judge, upon the receipt of the certificate issued by the board of education for the State fund belonging to his county, shall add thereto the county fund, if any, and deduct the amount estimated as his compensation and the commission of the treasurer and any other lawful expenses against said funds, and shall apportion the remainder to the several school districts or communities as per scholastic census." (P. 14, sec. 6.)

"Trustees shall make contracts with teachers, and in making them shall base their contract with the teachers on the basis of the number of pupils within scholastic age registered in the community: *Provided, however,* That should the attendance fall below thirty-three and one-third per cent. of the registered pupils in such community, the trustees thereof may discontinue the school.

"Trustees in making contracts with teachers shall determine the salary to be allowed, or wages to be paid, upon the following rates of tuition: To teachers holding a first-class certificate, not more than two dollars and fifty cents; to those holding a second-class certificate, not more than two dollars; and to such as hold a third-class certificate, not more than one dollar and fifty cents per month per capita shall be allowed for pupils within the scholastic age." (P. 21, secs. 5, 6.)

"School trustees shall determine how many schools shall be maintained in their respective school districts or communities, and at what points they shall be located; they shall determine when the schools shall be opened and when closed; they shall contract with teachers and manage and supervise the schools, subject to the rules and regulations of the county judge and State superintendent." (P. 22, sec. 7.)

"White and colored children shall not be taught in the same schools, but the colored children shall receive the benefit, as far as practicable, of the public-school fund, and the funds set aside in any district or community for colored children shall not be used for the education of white children, nor shall the public-school fund set aside in any district or community for white children be used for the education of colored children." (P. 23, sec. 12.)

Separate communities may be formed for the education of colored children; in which case the apportionment of school funds to such communities is made directly by the county judge. (See p. 19, sec. 4.)

The school reports for the years 1836-83 do not show the amounts used for white and colored schools separately.

VIRGINIA.

The superintendent of public instruction "shall annually, and as often besides as he may deem necessary, prepare a scheme for apportioning the money appropriated by the State for public free-school purposes among the several counties and cities, on the basis of the number of children between the ages of five and twenty-one years in each school district, as ascertained from the census of the previous year, or in default of that, from the latest and best official authority accessible to him. This scheme shall be accompanied by summaries of the data on which the same is founded, and when approved by the board of education a copy thereof and of the summaries aforesaid shall be furnished to the second auditor, to each county superintendent of schools, and to each county treasurer." (Sch. L's, 1883, p. 36, sec. 30.)

The county superintendent shall "prepare annually, and at such other times as may be necessary, under direction from the superintendent of public instruction, a scheme for apportioning the State and county school funds among the school districts within each county under his supervision, a copy of which scheme shall be furnished to the county treasurer and to the clerk of each school district, and also to the editor of each newspaper which may be published within the county." (Sec. 39.)

"The public free schools shall be free to all persons between the ages of five and twenty-one years residing within the school district: * * * *Provided,* That white and colored persons shall not be taught in the same school, but in separate schools, under the same general regulations as to management, usefulness, and efficiency; and any violation of these regulations which will impair the efficiency of the schools, or any discrimination in the pay of teachers in the same grade of schools in any school district, shall be deemed sufficient cause for the removal of the county school superintendent by the board of education." (P. 52, sec. 105.)

"In due time before the opening of schools in the next school year it shall be the duty of each district school board to determine by specified boundaries what shall be the area to be attached to each school-house for whites and to each school-house for

blacks. These areas shall be called subdistricts, and their boundaries may be changed, from time to time, at the discretion of the district board. The subdistricts for the whites shall be numbered with cardinal numbers, and the subdistricts for the blacks shall be lettered with capital letters. A full record of the subdistricting shall be made in the record book of the district." (Sec. 151.)

"In cases where subdistricts have been made to include territory which before belonged to other districts, either in or out of the county, it shall be the duty of the clerk of the board of district school trustees, as soon as may be after the subdistricting shall have been completed and before any apportionment of school money shall have been made, to take a census, in the usual form, of the school population in any such addition of territory. One copy of such census shall be furnished to the board of trustees of the district to which the territory has been added, and another to the board of trustees of the district from which the territory has been taken; and after the correctness of the census shall have been established, due report thereof shall be made to the county superintendent or superintendents concerned, and also to the superintendent of public instruction in cases where the school population of counties is affected; and thereafter all apportionments of school money shall be made in accordance with the results thus obtained." (Sec. 156.)

"All school moneys to be disbursed in any county shall be received, kept, and disbursed by the county treasurer thereof, subject to similar responsibility as in case of other funds by law committed to him." (Sec. 130.)

The Virginia school reports do not show the appropriations for white and colored schools separately.

WEST VIRGINIA.

The general school fund "shall be distributed to the several counties in the State in proportion to the number of youth therein, according to the latest enumeration made for school purposes." (Sch. L's, 1883, p. 37, sec. 60.)

"It shall be the duty of the auditor, on or before the tenth day of June, in each year, to ascertain the amount which is distributable among the several counties as aforesaid, and notify the State superintendent of free schools thereof, who shall thereupon ascertain the proper share of each county, and notify the auditor and each county superintendent; also the amount deducted by the auditor from the share of his county on account of salary paid the county superintendent, as required by section fifty-four, which amount the county superintendent shall also deduct from the share of his county before making his distribution of the same among the several districts thereof. Upon receiving such notice the county superintendent shall ascertain the proper share of each district and independent school district of his county, according to the number of youths therein, and give notice to the board of education of each district and independent school district in the county of the amount of general school fund due each, respectively, and that the same can not be drawn by them until they have made the levy required by the fortieth section of this chapter." (Sec. 61.)

"The boards of education of the several districts shall hold their first meeting for each school year on the first Monday in July. At this meeting they shall determine the number of months the school shall be held in the district, the number of teachers that may be employed in the several subdistricts, and fix the salaries that shall be paid to the teachers. In determining the salaries they shall have regard to the grade of teachers' certificates, fixing to each grade the salary that shall be paid to teachers of said grades in the several subdistricts." (Sec. 6.)

The attorney-general held that the above section requires that *all* the teachers in any district holding certificates of the same grade must be paid the same salary. (See p. 57.)

"White and colored persons shall not be taught in the same school; but to afford to colored children the benefits of a free-school education, it shall be the duty of the trustees of every subdistrict to establish therein one or more primary schools for colored persons between the ages of six and twenty-one years whenever the number of such persons residing therein, and between the ages aforesaid, exceeds fifteen, according to the enumeration made for school purposes. The trustees of two or more subdistricts, whether in the same or adjoining districts or counties, may, by agreement with each other, join in establishing a primary school for colored children residing in said subdistricts, and such school so established shall be subject to the same regulations as are provided for the schools for white children in section twelve of this chapter.

"Whenever, in any school district, the benefit of a free-school education is not secured to the colored children residing therein, in the manner mentioned in the preceding section, the fund applicable to the support of free schools in such subdistrict, whether received from the State or local taxation, shall be divided by the board of education in the proportion which the number of colored children bears to the number of white children therein, according to the latest enumeration made for school purposes; and the share of the former shall be set apart for the education of colored

persons of the proper age residing in such subdistrict or district, and be applied for that purpose from time to time in such way as the board of education of the district may deem best. Any board of education failing to comply with this section may be compelled to do so by the circuit court of the county by mandamus."

The school reports of West Virginia do not state the amounts appropriated for white and colored schools separately, but the amounts paid white and colored teachers are given:

| | Enumera- tion (6-21). | Paid teachers. | Amount per child. |
|---------------|--------------------------|-------------------|----------------------|
| 1886. | | | |
| White | 233,032 | \$644,177 | \$2.76 |
| Colored | 9,720 | 26,331 | 2.70 |
| 1887. | | | |
| White | 239,340 | 679,921 | 2.84 |
| Colored | 9,838 | 27,618 | 2.80 |
| 1888. | | | |
| White | 245,934 | 748,368 | 3.04 |
| Colored | 10,426 | 32,374 | 3.10 |

CHAPTER XXXIII.

STATISTICS OF PUBLIC ELEMENTARY SCHOOLS IN FOREIGN COUNTRIES.

REMARKS UPON THE TABLE.

The following table presents the statistics of public elementary schools, excluding infant schools, in countries whose official reports have been received in this Office.

Statistics of enrollment.—The totals of enrollment, column 5, must not be understood as including all children receiving elementary instruction; it is simply the number of children who have availed themselves of the public-school provision. An endeavor has been made in another part of this Report (pp. 76, 77) to show the number of children receiving instruction from all sources in several countries.

While in many countries very nearly the whole school population resorts to public schools, in other countries parochial or church schools bear an equal or possibly even greater part in the work; private nonparochial schools patronized by the wealthy exist in all countries, and in all home instruction supplies the place of school instruction for a small percentage of the population. In Great Britain it is assumed that one-seventh of the population will depend wholly upon private agencies for instruction, and the remaining six-sevenths are made the basis for estimating the amount of public-school accommodation to be supplied.

It is extremely difficult to deal with the statistics reported officially for Austria on account of the various classes of schools which participate in the work of elementary instruction. The official report presents the educational status of the entire school population; that is, the youth six to fourteen years of age. The total number is given as 3,295,552. The number reported as attending the public *Volksschulen*, i. e., people's schools, is used in the table before us. In addition to this number, viz., 2,748,347, there were in private *Volksschulen* 107,627, and in small elementary schools 1,695 pupils. There were also 50,628 youths of school age in attendance upon higher *Volksschulen*, or receiving instruction at home; 365,218 children are said to have been without instruction; leaving a small percentage who are classed as incapacitated by reason of bodily or mental infirmity.

For Great Britain and France enrollment in church schools is included in column 5 of the table. In the former these schools share with board schools in the public grant and are classed as public elementary schools; in the latter they are under the supervision of the Government, although not supported by public funds. The official reports for Ireland give the total enrollment, including all children who have made a single attendance upon the schools during the year. For 1888 this number was 1,060,895. The enrollment, as given in the table, includes only the pupils who may be presented for examination, and in respect of whom grants may be claimed; that is, pupils who made at least one attendance within the last 14 days preceding the Government examination.

The conflict between church and state authorities in several countries, notably in Belgium and the Netherlands, has caused great fluctuations in the attendance in public or state schools in recent years. For instance the enrollment for Belgium is very nearly double that reported in 1884-85 (*vide* Rep. of Commissioner, 1886-87).

The triumph of the antiliberal party in 1884 caused a radical change in the school policy. A new school law was passed allowing church schools to share in the public funds upon certain conditions, and in many ways strengthening the influence of the clergy in educational affairs. The result was a decline in public-school attendance, which is now, however, again upon the increase.

Teachers.—Pupil-teachers are employed in England and Wales, Scotland, New South Wales, and Japan, and are included in the totals of teachers for those countries.

Financial statistics—The expenditures given in column 16 of the table relate to the schools comprised in the table. The chief item in these expenditures is always the amount paid for teachers' salaries. In addition to this and incidental expenses, viz, the cost of books and material supplies, the costs of inspection, compulsion, and other administrative expenses are included in column 16. The totals presented in this column do not in every case comprise the entire amount given in the original reports under the head of expenditure for primary education. The differences arise in some cases from the fact that appropriations for special purposes, as pension funds, scholarship funds, etc., included in the original reports, are excluded from the totals here used. In other cases the original reports have classed as elementary, schools that do not come within the scope of this table, as infant schools, normal schools, etc. The expenditures for these have been subtracted from the totals used in column 16, excepting in the case of Belgium, whose reports do not give an itemized statement. Here expenditure for normal schools is included in the total for primary instruction. It should be observed that by far the larger proportion of the amounts expended always goes for teachers' salaries and the current incidental expenditures common to all systems. The special expenditures included for a few countries do not materially affect the relative bearing of the facts.

Statistics of public elementary education in foreign countries.

| Countries. | Population. | | Popula- tion to square mille. | Name and title of chief officer of education. | |

AMERICAN.

AINSWORTH, Joseph F., in Dedham, Mass., October 20, 1888, aged sixty-nine years; one of the oldest, best, and most respected of schoolbook publishers in the United States. To his wise foresight the public is indebted for the introduction and success of the Payson-Dunton writing books, Bartholomew's drawing books, Professor Crosby's Greek text-books, etc.

ALLEN, Nathan, M. D., LL. D., in Lowell, Mass., January 1, 1889, aged seventy-seven years; began academic studies at seventeen years, matriculating at Amherst College, 1832; was graduated in the class of 1836; received his medical degree in the Pennsylvania Medical School in 1841; was recently honored with the title LL. D. His published works are "The Opium Trade," 1853; "Important Medical Problems," 1874, etc. He was one of the oldest practitioners in Lowell.

BARNARD, Frederick Augustus Porter, D. D., LL. D., in New York, N. Y., May, 1889, aged seventy-nine years; president of Columbia College; for many years a most prominent literary man; graduated from Yale College in 1828; was teacher of deaf-mutes at Hartford and New York; was professor of mathematics and natural history in the University of Alabama, 1837-38, and of chemistry, 1838-54; then professor of astronomy in University of Mississippi, 1854 to 1861, becoming president the last two years; 1864 was made president of Columbia College; was president of the society for the advancement of science, and at different times an officer in the distinctively scholastic associations of Europe and America.

BARTLETT, Sidney, LL. D., in Boston, ———, 1888. He celebrated his ninetieth birthday the previous week and at the time was actively engaged in practice of law.

BOYCE, Rev. J. P., D. D., LL. D., at Pau, France, December 26, 1888, aged sixty years; president of Southern Baptist Theological Seminary, of Louisville, Ky.; founder of the seminary; president of the Southern Baptist Convention; a trustee of the "Slater fund," and held many important private and public trusts. His principal published works are: "A Brief Catechism on Bible Doctrines," "The Doctrine and Uses of the Sanctuary," "The Suffering Christ," and his largest and greatest work, "Abstracts of Systematic Theology," used as a text-book in the seminary.

BRAISLIN, Priscilla (Mrs. Timothy Merrick), Holyoke, Mass., December 15, 1888; was born near Burlington, N. J., 1838; for several years taught school in that city; was chosen tutor of mathematics and chemistry in Vassar College, 1865; was placed at the head of the mathematical department, which position she held until the spring of last year, resigning to become the wife of Mr. Merrick.

BREWER, Mrs. Gardiner, in Boston, Mass., December 14, 1888, aged eighty-five years; widely known for her numerous gifts to schools and charities.

- BRIDGMAN, Laura, South Boston, Mass., May 24, 1889, aged sixty years; over fifty years an inmate of the Perkins Institution for the Blind. She was deprived of *all* senses except that of touch, and through that she was taught to read, write, and converse, besides knitting and crocheting the most delicate lace. Her remarkable history is known throughout the world.

No. 12.—Institutions for the professional training of teachers.

No. 13.—August, 1868.

Contents.—Letters to editors and publishers of newspapers; Educational meetings in August
 1868; Letter respecting the reports of the Commissioner. Contents of special report on the
 District of Columbia. Index to subjects discussed in general reports, etc.

Special circulars.

1.

2. Circular respecting plan of publication. (Identical in matter with official
 circular No. 2.)

3. Circular respecting national land grants. (Identical in matter with official
 circular No. 3.)

4.

5.

6.

7. Circular respecting elementary education.

8.

9. Circular respecting school architecture.

10. Circular respecting normal schools and the professional training of teachers.
 (Identical in matter with official circular No. 12.)

¹ It was proposed to publish, during the Centennial year, a series of histories of colleges, universi-
 ties, professional schools, and special schools of science, but the following named only were issued:
 Historical sketch of Mount Holyoke Seminary, Historical sketch of Union College, and the History of
 the University of Missouri.

² From which all quotations are made.

Special circulars—Continued.

11. Circular respecting educational tracts.
12. Circular respecting institutions of natural science, February, 1868.
13. Circular respecting academies of design, galleries of art, and art culture.
14. Circular respecting public grounds.
15. Circular respecting newspapers and other periodicals.
16. Circular respecting report and documents for 1868.
- Circular respecting academies and other institutions of secondary education.

[The preceding list of official circulars, with illustrative documents, were issued by Dr. Henry Barnard.]

Circular of information, August, 1870. pp. 70.

Contents.—Illiteracy, derived from census tables of 1860; Educational statistics, translation of article by Dr. A. Ficker; Virchow on school-room diseases; Education of French and Prussian conscripts; School organization, etc.

Same, July, 1871. pp. 43.

Contents.—Public instruction in Sweden and Norway; The "folkehoiskoler" of Denmark.

Same, November, 1871. pp. 14. Methods of school discipline.

Same, December, 1871. pp. 17. Compulsory education.

Same, January, 1872. pp. 43. German and other foreign universities.

Same, February, 1872. pp. 77.

Contents.—Public instruction in Greece, the Argentine Republic, Chili, and Ecuador; Statistics respecting Portugal and Japan; Technical education in Italy.

Same, March, 1872. pp. 93.

Contents.—Vital statistics of college graduates; Distribution of college students in 1870-71; Vital statistics in the United States, with diagrams.

Same, April, 1872. pp. 125. Relation of education to labor.

Same, June, 1872. pp. 22. Education in the British West Indies.

Same, July, 1872. pp. 62. The Kindergarten.

Same, November, 1872. pp. 79. American education at the Vienna Exposition of 1873.

Same, 1, 1873. pp. 66. Historical summary and reports on the systems of public instruction in Spain, Bolivia, Uruguay, and Portugal.

Same, 2, 1873. pp. 30. Schools in British India.

Same, 3, 1873. pp. 118. College commencements for the summer of 1873, in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

Same, 4, 1873. pp. 72. List of publications by members of certain college faculties and learned societies in the United States, 1867-72.

Same, 5, 1873. pp. 155. College commencements during 1873 in the Western and Southern States.

Same, 1, 1874. pp. 77. Proceedings of the Department of Superintendence of the National Educational Association, Washington, D. C. [1874].

Same, 2, 1874. pp. 56. Drawing in public schools; present relation of art to education in the United States.

Same, 3, 1874. pp. 87. History of secondary instruction in Germany.

Same, 1, 1875. pp. 114. Proceedings of the Department of Superintendence of the National Educational Association, Washington, D. C. [1875].

Same, 2, 1875. pp. 64. Education in Japan.

Same, 3, 1875. pp. 108. Public instruction in Belgium, Russia, Turkey, Servia, and Egypt.

Same, 4, 1875. pp. 16. Waste of labor in the work of education.

Same, 5, 1875. pp. 26. Educational exhibit at the International Centennial Exhibition, 1876.

Same, 6, 1875. pp. 208. Reformatory, charitable, and industrial schools for the young.

Same, 7, 1875. pp. 130. Constitutional provisions in regard to education in the several States.

Same, 8, 1875. pp. 15. Schedule for the preparation of students' work for the centennial exhibition.

Same, 1, 1877. pp. 28. Education in China.

Same, 2, 1877. pp. 77.

Contents.—Public instruction in Finland, the Netherlands, Denmark, Württemberg, and Portugal; The University of Leipzig.

Same, 1, 1878. pp. 36. Training of teachers in Germany.

Same, 2, 1878. pp. 24. Elementary education in London.

Circular of information No. 1, 1879. pp. 21. Training schools for nurses.

Same, 2, 1879. pp. 192.

Contents.—Proceedings of the Department of Superintendence of the National Educational Association, 1877 and 1879, Washington, D. C.; Proceedings of the conference of college presidents and delegates, Columbus, Ohio, December, 1877.

Same, 3, 1879. pp. 37. Value of common school education to common labor. [Reprinted from Annual Report, 1872.]

Same, 4, 1879. pp. 49. Training schools of cookery.

Same, 5, 1879. pp. 37. American education as described by the French commission to the international exhibition of 1876.

Same, 1, 1880. pp. 27. College libraries as aids to instruction.

Same, 2, 1880. pp. 112. Proceedings of the Department of Superintendence of the National Educational Association, Washington, D. C., 1880.

Same, 3, 1880. pp. 96. Legal rights of children.

Same, 4, 1880. pp. 106. Rural school architecture.

Same, 5, 1880. pp. 26. English rural schools.

Same, 6, 1880. pp. 219. Instruction in chemistry and physics in the United States.

Same, 7, 1880. pp. 36. The spelling reform.

Same, 1, 1881. pp. 26. Construction of library buildings.

Same, 2, 1881. pp. 22. Relation of education to industry and technical training in American schools.

Same, 3, 1881. pp. 79. Proceedings of the Department of Superintendence of the National Educational Association, New York, 1881.

Same, 4, 1881. pp. 144. Education in France.

Same, 5, 1881. pp. 47. Causes of deafness among school children and the instruction of children with impaired hearing.

Same, 6, 1881. pp. 29. Effects of student life on the eyesight.

Same, 1, 1882. pp. 28. Inception, organization, and management of training schools for nurses.

Same, 2, 1882. pp. 112. Proceedings of the Department of Superintendence of the National Educational Association, Washington, 1882.

Same, 3, 1882. pp. 67. University of Bonn.

Same, 4, 1882. pp. 37. Industrial art in schools.

Same, 5, 1882. pp. 14. Maternal schools in France.

Same, 6, 1882. pp. 63. Technical instruction in France.

Same, 1, 1883. pp. 46. Legal provisions respecting the examination and licensing of teachers.

Same, 2, 1883. pp. 30. Coeducation of the sexes in the public schools of the United States.

Same, 3, 1883. pp. 81. Proceedings of the Department of Superintendence of the National Educational Association, Washington, D. C., 1883.

Same, 4, 1883. pp. 82. Recent school-law decisions.

Same, 1, 1884. pp. 11. Meeting of the International Prison Congress at Rome.

Same, 2, 1884. pp. 184. The teaching, practice, and literature of shorthand. [Second and enlarged edition.]

Same, 3, 1884. pp. 99. Illiteracy in the United States. With appendix on national aid to education.

Same, 4, 1884. pp. 176. Proceedings of the Department of Superintendence of the National Educational Association, Washington, D. C., 1884.

Same, 5, 1884. pp. 28. Suggestions respecting the educational exhibit at the New Orleans Exposition, 1884-85.

Same, 6, 1884. pp. 90. Rural schools: progress in the past; means of improvement in the future.

Same, 7, 1884. pp. 158. Aims and methods of the teaching of physics.

Same, 1, 1885. pp. 207. City school systems in the United States.

Same, 2, 1885. pp. 206. Teachers' institutes.

Same, 3, 1885. pp. 55. Review of the reports of the British royal commissioners on technical instruction, with notes.

Same, 4, 1885. pp. 56. Education in Japan.

Same, 5, 1885. pp. 183. Physical training in American colleges and universities.

Same, 1, 1886. pp. 78. Study of music in public schools.

Same, 2, 1886. pp. 91. Proceedings of the Department of Superintendence of the National Educational Association, Washington, D. C., 1886.

- ALABAMA. (An. rep. 1870, p. 81; 1873, p. 6; 1874, p. 7; 1875, p. 10; 1876, p. 9; 1877, p. 6; 1878, p. 7; 1879, p. 7; 1880, p. 8; 1881, p. 6; 1882-83, p. 6; 1883-84, p. 7; 1884-85, p. 7; 1885-86, p. 24; 1886-87, p. 407; 1887-88, p. 408. (Circ. inf. 3, 1889, p. 253.)
- ARIZONA. (An. rep. 1886-87, p. 408.)
- ARKANSAS. (An. rep. 1873, p. 17; 1874, p. 12; 1875, p. 18; 1876, p. 19; 1877, p. 10; 1878, p. 12; 1879, p. 10; 1880, p. 15; 1881, p. 10; 1882-83, p. 11; 1883-84, p. 13; 1884-85, p. 14; 1885-86, p. 24; 1886-87, p. 408; 1887-88, p. 410.)
- CALIFORNIA. (An. rep. 1870, p. 89; 1871, p. 83; 1872, p. 23; 1874, p. 24; 1875, p. 30; 1876, p. 28; 1877, p. 17; 1878, p. 18; 1879, p. 16; 1880, p. 23; 1881, p. 15; 1882-83, p. 17; 1883-84, p. 21; 1884-85, p. 21; 1885-86, p. 25; 1886-87, p. 409; 1887-88, p. 410.)
- San Francisco City training schools. (An. rep. 1868, p. 819.)
- State normal school. [San Francisco.] (An. rep. 1863, p. 769.)
- COLORADO. (An. rep. 1878, p. 24; 1879, p. 23; 1880, p. 32; 1881, p. 22; 1882-83, p. 24; 1883-84, p. 30; 1884-85, p. 23; 1885-86, p. 25; 1886-87, p. 410; 1887-88, p. 413.)

Normal and training schools. [By States.] CONNECTICUT. (An. rep. 1871, p. 98; 1872, p. 36; 1873, p. 43; 1874, p. 44; 1875, p. 51; 1876, p. 47; 1877, p. 27; 1878, p. 29; 1879, p. 28; 1880, p. 41; 1881, p. 28; 1882-83, p. 32; 1883-84, p. 38; 1884-85, p. 37; 1885-86, p. 26; 1886-87, p. 411; 1887-88, p. 414.)

— New Haven City training school. (An. rep. 1863, p. 817.)

— DAKOTA. (An. rep. 1878, p. 271; 1879, p. 269; 1881, p. 233; 1882-83, p. 286; 1883-84, p. 292; 1884-85, p. 291; 1886-87, p. 412; 1887-88, p. 414.)

— DELAWARE. (An. rep. 1870, p. 105; 1872, p. 53; 1873, p. 56; 1874, p. 57; 1875, p. 62; 1876, p. 58; 1877, p. 33; 1878, p. 36; 1879, p. 35; 1880, p. 49; 1881, p. 36; 1882-83, p. 38; 1883-84, p. 49; 1884-85, p. 44; 1885-86, p. 27; 1886-87, p. 413.)

— Delaware State normal university. (An. rep. 1863, p. 807.)

— DISTRICT OF COLUMBIA. (An. rep. 1873, p. 437; 1874, p. 476; 1875, p. 489; 1876, p. 442; 1877, p. 280; 1878, p. 275; 1879, p. 273; 1880, p. 363; 1881, p. 286; 1882-83, p. 289; 1883-84, p. 295; 1884-85, p. 295; 1886-87, p. 413.)

— FLORIDA. (An. rep. 1878, p. 39; 1879, p. 38; 1880, p. 56; 1881, p. 39; 1882-83, p. 42; 1883-84, p. 50; 1884-85, p. 47; 1885-86, p. 27; 1886-87, p. 414; 1887-88, p. 417.)

— GEORGIA. (An. rep. 1874, p. 73; 1875, p. 74; 1876, p. 71; 1877, p. 40; 1878, p. 45; 1879, p. 42; 1880, p. 62; 1881, p. 44; 1882-83, p. 46; 1883-84, p. 56; 1884-85, p. 53; 1885-86, p. 27; 1886-87, p. 414; 1887-88, p. 417.)

— IDAHO. (An. rep. 1884-85, p. 300.)

— ILLINOIS. (An. rep. 1870, p. 114; 1871, p. 141; 1872, p. 89; 1873, p. 88; 1874, p. 88; 1875, p. 86; 1876, p. 83; 1877, p. 48; 1878, p. 62; 1879, p. 49; 1880, p. 72; 1881, p. 51; 1882-83, p. 54; 1883-84, p. 63; 1884-85, p. 62; 1885-86, p. 28; 1886-87, p. 415; 1887-88, p. 418.)

— Illinois State normal university at Normal. (An. rep. 1868, p. 745.)

— INDIANA. (An. rep. 1871, p. 154; 1872, p. 111; 1873, p. 102; 1874, p. 104; 1875, p. 104; 1876, p. 101; 1877, p. 56; 1878, p. 63; 1879, p. 59; 1880, p. 82; 1881, p. 60; 1882-83, p. 64; 1883-84, p. 75; 1884-85, p. 72; 1885-86, p. 23; 1886-87, p. 416; 1887-88, p. 420.)

— City training schools in Indianapolis, Fort Wayne, and Evansville. (An. rep. 1863, p. 815.)

— State normal school, Terre Haute. (An. rep. 1863, p. 781.)

— INDIAN TERRITORY. (An. rep. 1880, p. 295; 1882-83, p. 297.)

— IOWA. (An. rep. 1871, pp. 162, 163; 1873, p. 110; 1874, p. 116; 1875, p. 118; 1876, p. 114; 1877, p. 65; 1878, p. 70; 1879, p. 66; 1880, p. 92; 1881, p. 69; 1882-83, p. 73; 1883-84, p. 84; 1884-85, p. 81; 1886-87, p. 418; 1887-88, p. 421.)

— City training schools in Iowa: Davenport, Ottumwa, Manchester. (An. rep. 1863, p. 812.)

— Normal department State university. (An. rep. 1863, p. 725.)

— KANSAS. (An. rep. 1870, p. 141; 1871, pp. 174, 179; 1872, p. 121; 1873, p. 117; 1874, p. 125; 1875, p. 131; 1876, p. 127; 1877, p. 71; 1878, p. 77; 1879, p. 73; 1880, p. 102; 1881, p. 77; 1882-83, p. 81; 1883-84, p. 92; 1884-85, p. 89; 1885-86, p. 29; 1886-87, p. 418; 1887-88, p. 422.)

— Kansas State normal school at Emporia. (An. rep. 1863, p. 771.)

— KENTUCKY. (An. rep. 1873, p. 127; 1874, p. 135; 1875, p. 142; 1876, p. 137; 1877, p. 77; 1878, p. 83; 1879, p. 79; 1880, p. 111; 1881, p. 83; 1882-83, p. 86; 1883-84, p. 100; 1884-85, p. 96; 1886-87, p. 419; 1887-88, p. 423.)

— LOUISIANA. (An. rep. 1873, p. 137; 1874, p. 149; 1875, p. 153; 1876, p. 149; 1877, p. 84; 1878, p. 88; 1879, p. 86; 1880, p. 120; 1881, p. 88; 1882-83, p. 91; 1883-84, p. 106; 1884-85, p. 103; 1886-87, p. 420; 1887-88, p. 424.)

— State normal school, New Orleans. (An. rep. 1863, p. 808.)

— MAINE. (An. rep. 1871, p. 204; 1872, p. 143; 1873, p. 143; 1874, p. 159; 1875, p. 162; 1876, p. 159; 1877, p. 89; 1878, p. 93; 1879, p. 91; 1880, p. 128; 1881, p. 93; 1882-83, p. 96; 1883-84, p. 114; 1884-85, p. 110; 1885-86, p. 29; 1886-87, p. 420; 1887-88, p. 425.)

— Maine State normal schools at Farmington and Castine. (An. rep. 1863, p. 775.)

— MARYLAND. (An. rep. 1871, p. 210; 1873, p. 157; 1874, p. 172; 1875, p. 175; 1876, p. 172; 1877, p. 97; 1878, p. 99; 1879, p. 97; 1880, p. 135; 1881, p. 99; 1882-83, p. 102; 1883-84, p. 120; 1884-85, p. 117; 1885-86, p. 30; 1886-87, p. 421; 1887-88, p. 426.)

— Maryland State normal school, Baltimore. (An. rep. 1863, p. 779.)

— MASSACHUSETTS. (An. rep. 1871, p. 216; 1872, p. 160; 1873, p. 178; 1874, p. 187; 1875, p. 192; 1876, p. 187; 1877, p. 110; 1878, p. 110; 1879, p. 103; 1880, p. 148; 1881, p. 110; 1882-83, p. 114; 1883-84, p. 135; 1884-85, p. 131; 1885-86, p. 30; 1886-87, p. 421; 1887-88, p. 427.)

— Course of study in the normal schools adopted January 9, 1866. (An. rep. 1863, p. 637.)

- Normal and training schools.** [By States.] **MASSACHUSETTS.** State normal schools at Framingham, Westfield, Bridgewater, and Salem. (An. rep. 1863, pp. 659-700.)
- **MICHIGAN.** (An. rep. 1870, p. 186; 1871, p. 239; 1873, p. 198; 1874, p. 208; 1875, p. 214; 1876, p. 204; 1877, p. 124; 1878, p. 123; 1879, p. 121; 1880, p. 163; 1881, p. 125; 1882-83, p. 127; 1883-84, p. 146; 1884-85, p. 143; 1885-86, p. 31; 1886-87, p. 426; 1887-88, p. 429.)
- State normal school at Ypsilanti. (An. rep. 1868, p. 719.)
- **MINNESOTA.** (An. rep. 1870, p. 195; 1871, p. 249; 1872, p. 191; 1873, p. 198; 1874, p. 222; 1875, p. 226; 1876, p. 216; 1877, p. 133; 1878, p. 132; 1879, p. 129; 1880, p. 174; 1881, p. 134; 1882-83, p. 137; 1883-84, p. 153; 1884-85, p. 150; 1885-86, p. 31; 1886-87, p. 427; 1887-88, p. 430.)
- Minnesota State normal school at Winona. (An. rep. 1868, p. 761.)
- **MISSISSIPPI.** (An. rep. 1870, p. 201; 1871, p. 257; 1872, p. 198; 1873, p. 217; 1874, p. 231; 1875, p. 235; 1876, p. 224; 1877, p. 140; 1878, p. 137; 1879, p. 134; 1880, p. 181; 1881, p. 140; 1882-83, p. 141; 1883-84, p. 159; 1884-85, p. 155; 1886-87, p. 427; 1887-88, p. 432.)
- **MISSOURI.** (An. rep. 1870, pp. 205, 206; 1871, p. 264; 1872, p. 203; 1873, p. 228; 1874, p. 241; 1875, p. 217; 1876, p. 234; 1877, p. 146; 1878, p. 144; 1879, p. 139; 1880, p. 183; 1881, p. 145; 1882-83, p. 147; 1883-84, p. 164; 1884-85, p. 160; 1885-86, p. 31; 1886-87, p. 428; 1887-88, p. 433.)
- St. Louis City normal school. (An. rep. 1868, p. 609.)
- **MONTANA.** (An. rep. 1884-85, p. 305; 1886-87, p. 430; 1887-88, p. 434.)
- **NEBRASKA.** (An. rep. 1873, p. 237; 1874, p. 253; 1875, p. 258; 1876, p. 244; 1877, p. 154; 1878, p. 151; 1879, p. 146; 1880, p. 197; 1881, p. 153; 1882-83, p. 154; 1883-84, p. 172; 1884-85, p. 165; 1885-86, p. 32; 1886-87, p. 430; 1887-88, p. 434.)
- State normal school at Peru. (An. rep. 1868, p. 791.)
- **NEVADA.** (An. rep. 1871, p. 274; 1873, p. 245; 1878, p. 156; 1880, p. 203; 1883-84, p. 176; 1884-85, p. 174; 1885-86, p. 33; 1886-87, p. 431; 1887-88, p. 434.)
- **NEW HAMPSHIRE.** (An. rep. 1871, p. 277; 1872, p. 220; 1873, p. 252; 1874, p. 268; 1875, p. 270; 1876, p. 257; 1877, p. 163; 1878, p. 160; 1879, p. 155; 1880, p. 207; 1881, p. 161; 1882-83, p. 163; 1883-84, p. 180; 1884-85, p. 179; 1885-86, p. 33; 1886-87, p. 431; 1887-88, p. 435.)
- **NEW JERSEY.** (An. rep. 1870, p. 223; 1871, p. 284; 1873, p. 264; 1874, p. 281; 1875, p. 280; 1876, p. 267; 1877, p. 170; 1878, p. 168; 1879, p. 161; 1880, p. 215; 1881, p. 169; 1882-83, p. 170; 1883-84, p. 187; 1884-85, p. 187; 1886-87, p. 432; 1887-88, p. 436.)
- New Jersey State normal school. (An. rep. 1868, p. 729.)
- **NEW MEXICO.** (An. rep. 1886-87, p. 433.)
- **NEW YORK.** (An. rep. 1870, p. 231; 1871, p. 295; 1872, p. 234; 1873, p. 284; 1874, p. 300; 1875, p. 293; 1876, p. 281; 1877, p. 179; 1878, p. 177; 1879, p. 171; 1880, p. 226; 1881, p. 180; 1882-83, p. 180; 1883-84, p. 197; 1884-85, p. 198; 1885-86, p. 33; 1886-87, p. 433; 1887-88, p. 437.)
- State normal and training school at Oswego. (An. rep. 1868, p. 713.)
- State normal school at Albany. (An. rep. 1868, p. 703.)
- **NORTH CAROLINA.** (An. rep. 1873, p. 303; 1874, p. 320; 1875, p. 322; 1876, p. 299; 1877, p. 191; 1878, p. 187; 1879, p. 182; 1880, p. 239; 1881, p. 195; 1882-83, p. 194; 1883-84, p. 208; 1884-85, p. 210; 1885-86, p. 34; 1886-87, p. 437; 1887-88, p. 441.)
- **OHIO.** (An. rep. 1870, p. 254; 1872, p. 272; 1873, p. 321; 1874, p. 332; 1875, p. 334; 1876, p. 313; 1877, p. 201; 1878, p. 194; 1879, p. 189; 1880, p. 251; 1881, p. 204; 1882-83, p. 205; 1883-84, p. 216; 1884-85, p. 217; 1885-86, p. 35; 1886-87, p. 438; 1887-88, p. 441.)
- History of normal schools in Ohio. (An. rep. 1868, p. 793.)
- Professional training of teachers in Ohio, by E. E. White. (An. rep. 1868, pp. 795-805.)
- State normal schools. (An. rep. 1868, p. 752.)
